The Harbingers (The damnation Chronicles # 4) Joseph Sweet

In Sackets Harbor, New York, on a beautiful summer day, all hell is about to break loose. Men and women from other worlds similar to this one have passed through a portal outside of the earth's atmosphere and are hurtling toward the surface. These have been gathered by fallen angels to topple a corrupt false god and though that is no longer their goal it may yet need to happen. This world may be all that is left of what was once a number beyond the mathematical capabilities of the average human mind. And it will soon be gone unless Marcus and a handful of powerful beings, with an army of gathered souls can manage to save it. An amnesiac former arch-angel of death in human form, a shape-shifter, Rose, Marcus and some others will have to sacrifice nearly everything to survive. But will they work together or fall to the darkness that is closing in on this world? And when all is said and done, will they have been the harbingers of light and life, or of death and eternal darkness?

Lori Leidig says

It is hard to review books in a series due to possibly giving away spoilers from the previous books... but I'll give'r a go. Let's see now... Book one was great. It left me wanting to dive into book 2 as soon as possible, partly because of a WTF? moment towards the end of book one.

Book two was even better. It gave me an 'AHA*' moment or two, having clarified the reason behind the WTF moment a bit.

Then came Book three. Holy schmolly macaroli! Book three brought every single thing together in a way that had me standing up and cheering. Outstanding!

Now we have the fourth book. This one is a wonderful read as well. There are some completely unexpected events that had me grinning & nodding and mouthing the words "Well played, Joe. Well played." The Harbingers may or may not be the final book in this particular series. The ending left it open to go either way, and did so in a very satisfactory manor. I'm happy here, but would also be happy to see some these characters again. That, my friends, is the mark of a most excellent writer.

I highly recommend The Damnation Chronicles if you are into fantasy-horror with a touch of sci-fi here and there. Loved it!
