I liked this book because I like dragons. I also liked this book because I like the moon.

?I enjoyed this book because I liked the part when Drake and Haru found the Pyramid of Seven Dragons. ?I also enjoyed this book because I liked the part when Drake finally found the Prime Dragon Stone. ?I also enjoyed this book because I liked the part when they finally found the way into the Pyramid of Seven Dragons. ?

Our four-year old son LOVES this series. Often, we hear him continuing to talk about it to himself even after lights-out.

Continuing the Dragon Master series, the masters are in danger of losing their connections with their dragons. As the link grows weaker, the masters are called to the land of pyramids where they must work together to solve a series of riddles to get to the dragon stone and hopefully rejuvenate their powers. The bond between the kids is stronger in this particular book as we see them working together really for the first time.

Christine Rains says

The young Dragon Masters' connections to their dragons is failing. They must travel to the Land of Pyramids to find the prime Dragon Stone. There are many puzzles to solve. Will they be able to work them out and find the stone in time?

This is the sixth book in the series, and my seven-year-old is still enjoying them. He was excited to see Heru and his moon dragon Wati return. He liked working out the puzzles with the Dragon Masters. Awesome

illustrations and a fast moving plot make this a great read.

I was surprised to see this book at the library, as it was not listed under the Dragon Masters series in Goodreads. My 7-year-old daughter was thrilled as we've been waiting to continue the series. The story was as fun as the others, and the illustrations continue to be masterfully done. Although there are a lot more characters and voices to keep track of now. That said, it wasn't confusing at all. I enjoyed reading it to her and she couldn't get enough.

My youngest two children adore this series of books. In fact the last few we have bought on the day they come out. We have read this one together three times now. And every time we finish one there is a teaser for the next volume and we wait months for it to come out. This fifth installment in the series is another great read. The Dragon Masters books can be read separately but they do tell one continuous story so they are best read in order.

In this adventure the dragon stones are seeming to fail. The children and their dragons head back to Egypt and with the help of Heru's parents they read the legend of the pyramid of the seven dragons. They must solve the riddle to find the pyramid and then all the puzzles to get to the master dragon stone. With each puzzle they solve one dragon master and one dragon must stay behind. They must complete the tasks in the right order or forever be trapped. That is a lot of responsibility for 6 young dragon masters and their dragons.

Damien Jones does some awesome illustrations. My children love going over the pictures again and again. There are pictures on most pages and embellishments on all the pages. The artwork really does take the story from good to great. They make the story come alive and spark the imagination.

This is a fantastic series and one of my children's favorite series currently. We have reread this book and all the others a number of times now. The whole family enjoys joining Drake and the other dragon masters on each new adventure. We eagerly wait for each new book to come out. From my youngest who is 5 to the oldest who is 10 this book is loved. This is a great book and a great series for young readers of those who read to and with them. They come highly recommended by the whole family!

The thing I liked most and least about this book is the same. I really liked that each dragon and dragon master had a door to open. I really didn't like that each time a door was opened a friend got left behind. Bo and Ana are my favorite friends and they were left behind first.

It's pretty cool that they found a new baby dragon.

Dominique says

It was my favorite book out of all the Dragon masters books. I really liked the story line if it.

Stephanie P says

I read this one aloud with my almost 5 year old son. This series is definitely his favorite chapter book series right now. This was an exciting, fun read with new mystery and adventure added in. He loves learning about the different dragons and Dragon Masters and trying to guess what's going to happen next.

Jaie says

Again, 5yo likes them. I don't.

Theresa says

In this book they rely on the strength of all of the dragons. The dragon stone is weakening and they fly to Heru's homeland to save it.

They find the pyramid of the seven dragons and each dragon and dragon master has to solve a doorway.

In the end Drake discovers that they weren't quite accurate about the dragon stone. Griffith and Diego show up to tell them what they discovered only minutes after the dragon masters figure it out themselves.

The book ends with a baby dragon on the loose. Now the masters must try to help it before someone evil catches it.

Lori says

My son loves reading this series....and he has a hard time getting in to most books.
