In The Minds Of Murderers

Paul Roland

In The Minds Of Murderers Paul Roland

- What motivates an outwardly normal man to abduct, torture and murder a complete stranger?
- Why do particular personality types join a terrorist cell?
- What goes through the mind of a father who plans to kill his entire family in cold blood and fake his own disappearance?

In The Minds of Murderers explores these questions and more, drawing on the often harrowing real-life experiences of the world's leading criminal profilers and forensic psychologists who have been responsible for tracking down some of the most notorious serial killers, sexual predators, extortionists and terrorists of modern times.

While many infamous killers are profiled in these pages, the dark heart of this book explores the nature of evil and what motivates men, women and sometimes even children to commit the most appalling acts imaginable. It also explodes the myth of the motiveless crime and challenges the popular belief that all killers are crazy.

Sharon says

Intresting look at criminal profiling. Like that it dosn't just look at known serial killers, but at also despot leaders, and those who acted in the name of their 'cause'

Darcia Helle says

This is a fascinating look at the art of criminal profiling. The pages aren't filled with gory details. Instead, we're given the truth behind profiling of all crimes, including rape, kidnapping, and serial murder. Paul Roland offers multiple examples of both recent and historical cases. There are also sections specifically about child killers and female killers.

Roland's writing style is engaging. This is an easy but informative read for anyone intrigued by the criminal mind.

Aleksandra says

Quick and fun (can I even say that?) read. Doesn't go too much into depth of the practices of profiling, but it describes particular cases well. It's a good book to start with if you're planning on writing a crime novel.

Debbie says

Type of thing that interests me

Aliah Verde Al Awadhi says

Helped me a lot with my essay about serial killers. Very informative book.

Brittany says

I'm already half way through this book and loving it.

Deanne says

Interesting book which focuses on profiling,not just murderers but other types of criminals.

Cassandra says

Really amazing insight into the the psychology of murderers.

Gigi S. says

Interesting book--Loving the case about the serial killer kid. So weird!
