Such a great read with an ending to each of the characters stories that I never expected, can't wait to start reading crossroads. It is a good read for young adults and it really spoke to me about making our way through life and not letting others control us but letting ourselves control and create what we do and become in life. :)

Holly's 4 Star Review

Finding My Way is a contemporary novel about - yep, you guessed it - finding your way. Told from the POV of Emma, Seth and Nick we get to see three different stories that overlap as their paths cross. With plenty of laughs, love, friendship and a huge helping of "WHO WILL SHE CHOOSE???" Megan Kieth has written a story that will capture your attention and leave you needing more.

The first chapter had me hooked straight away. Emma kept zoning out on the world around her - no matter who she was talking to - and day dreaming of sex, sex and more sex. This had me laughing a lot because i myself have a tendency to go in to my own world, and because Emma just seemed like a real nympho and you wouldn't typically expect that of her character. Dirty mind aside, she had gone through a break up with her long term boyfriend and she hadn't yet moved on. she wasn't really living her life and after she finds out that her ex is now seeing someone, she finally decides that now is the time.

Enter Seth. The gorgeous colleague that has been the center of her naughty thoughts since he started working there 3 months ago. He's drop dead gorgeous and incredibly sweet. But maybe too sweet for me. I guess i like to have abit of drama but Seth was so . . . safe. He was all about the hearts and flowers and while i do love that, i need abit of excitement. He was so, so caring and especialy to his little sister who suffered nightmares due to her past and my heart competely melted seeing him with her. I really did love Seth as a character but he wasn't the only guy after Emma . . .

Nick works at the train station that Emma uses to get to work so he sees her almost every day but Emma doesn't notice him until she finally realises that she needs to get over her ex. Nick is a man whore. Plain and simple. He not only works the booth at the train station but he's also a DJ at various nightclubs so he's never short on offers from the ladies, and he never turns them down. I was so torn over Nick because I could tell that he had feelings for Emma but he was such a slut!!! I did really like him though. He was funny and underneath it all he had a heart of gold.

I was so undecided pretty much the whole way through the book about who I wanted Emma to be with. Both guys had their good and bad points and I will admit that very briefly I actually wanted her to get back with her ex but shhhh. I would have rated this book higher but for me, it was just too long! After reading for an hour I was only 9% in and was a little put off by the fact that it was 521 pages long. Don't get me wrong, I love books in length but this just seemed to be too long and for a while I struggled with that but once I got past 50% and saw that the end was in sight, I really got back in to it again and enjoyed it.

Emma does date one of the guys in the book (no, I'm not saying who) but by the end, all three have found their way on their own and it is left open for book 2. And guess what?? I finally decided which guy I love most!! So Megan Kieth, please PICK NICK. I look forward to reading the sequel and I really, really hope that she picks Nick!!

2.5 Stars

This book was a tough one for me. It is told in multiple character's POV, which normally I love. But in this case we are not only getting their voice but their life as well. So, we have Emma, Nick and Seth that are the main characters that we hear from. In addition to them, we have Seth and his family & friends, Emma with her family & friends and finally Nick with his family and friends. Then we have Nick and Emma as well as Seth and Emma.

Confused yet?! I know I was!

There were too many things going on in this book and I found myself skimming A LOT. I wish the author would have picked one character (preferably Emma) to focus on and then bring in Seth and Nick's POV surrounding that one storyline. By doing that, it would have made me feel less like I was reading multiple books at the same time. I am a simple reader that likes my books the same way. When you throw in too many characters for me to keep up with, I tend to lose focus of the story the author is trying to tell. And even more so if there are nearly 500 pages!!

Now, the story itself (taking in to consideration what I said above) is good. If I strip away all the extra, I liked it. The title is very fitting as it truly is a book of 3 people trying to find their way. Emma is struggling to enter the dating world again after getting out of a long term relationship. Needless to say, when she decided to jump back in, she did it very well. Not only does she have Seth but Nick as well. And even though there was two guys, I never felt like it was a love triangle going on.

The ending was another disappointment. I expect for a book of this length to have an ending that wraps everything up for the characters. I could see if maybe Seth or Nick's story were let open-ended for their own book. But here we are left with no resolution for either of them or Emma!

I will close by saying although this book was not a fit for me personally, I always recommend readers download the sample from Amazon to be their own judge. Because as my favorite saying reads "No Two People Ever Read The Same Book".

2.5-3 Crazy Long Stars!!

I stopped reading this when I first started as I just couldn't take the whole love triangle thing even though everyone claimed its not really a love triangle well it pissed me off so I stopped and told myself I would go back and try to finish it off one day. That day was a few days ago after finishing an amazing book I decided to get back to this one. And since my break things had changed because at the start I don't even know why but I liked Seth and I was annoyed that Emma had feelings for both the guys and so on. Coming back to it I was like..I liked Seth? Why the fuck did I like him? what a pushy pussy..ohh he annoyed me.

And with these situations when the main female character has feelings for more than one character I have a feeling called fukin-pissed-off! I hate it and I instantly hate the female character wanting to punch her in the tits and make her understand that she is confusing me and should have feelings for only one character. **I AM JUST A SIMPLE GIRL WHY DYA HAVE TO MAKE THIS HARD ON ME?**

Nick was the only good thing about this book he wasn't settled down didnt have a great job but he was fun and loving. Emma and Nick needed to spit out the truth and be upfront about their feelings oh it would have saved sooo much time and then we could have got rid of Seth right?

After falling for Nicks character, I was totally uninterested in Seth's character. This book has all three characters POVs I dont usually mind more than one POV but this became too much for me. Whenever it got to Seths POV I was like...

By the end I was like phew okay so on to the next book because I do want more Nick. Lets hope things get better ;)

Reviewed for Confessions From Romaholics

Before I give you my opinion on this book, I must make a point clear. I was a beta reader for this book. I read the copy before the paperback release, which has been revised and therefore this review is based on the beta copy. That being said, there were no changes to the story as far I know, only grammatical changes.

Finding My Way is the first novel from Megan Keith. It tells the story of a young woman who is completely lost in her personal and professional life and only started to realise the extent of it after a break up that happened eleven months ago. Emma is full of regrets, she wishes she went to university instead of going straight into the workforce and breaking up with her supposed soul mate Josh. She finds herself in a rut because her best friend Kat is getting married and the whole old gang is brought back together for wedding, continually reminding her of Josh and what happened, the good and the bad.

Then she hears that Josh has been dating someone else and it's the final straw, Emma decides to move on, to the relief of Kat. There is a marked difference in Emma that is noted by two very attractive men, Seth and Nick, who see a beautiful woman they each want distinctly different things from.

Seth is a co-worker and embodies everything that Emma wants to achieve professionally. He went to university and is now on the verge of his dream job in the IT field. He is biding his time until he gets the call that a spot is open. His personal life is a mess; his younger sister is having nightmares and his best friends/roommates are acting up. One roommate is addicted to playing games and the other roommate is never home and when he is, acts very quiet and is unwilling to share where he disappears to. Seth wants to change his situation and decides he will move out and find a partner and thinks that Emma is perfect. However she does not seem to notice him until Seth makes his intentions clear. Unfortunately, Emma is involved with another guy who is his polar opposite and only offers what she needs for now. A rebound relationship cannot be a long term relationship.

Nick is in his late twenties and never wanted to go to university. He wanted to become a DJ and he is on his way to becoming a well-known one. However, he has to pay the bills and works at a newspaper stand in the train station. His Greek father disagrees with his son's path and wishes that he was more like his best friend Dan who went to university to become an accountant. Nick is a manwhore—putting it lightly. He notices the ladies and they notice him and he's willing to help them when they are pretty. When Emma smiles at him while thinking about Seth as she arrives at the train station to buy a ticket, everything changes.

Three point of views, two guys, one girl, and one common story; it's only just the beginning and I want the next book now. Write faster, Megan! I love the setting, the places used, and the characters. Each of them have hit a crossroad and while this is Emma's book, the guys and the other secondary characters are not bystanders. Each of them provides input to the main problem and in the end we get a wonderful debut book from author who has become a personal favourite of mine.

The first thing that I have to mention is that I LOVE the cover of this book. Something about it really appealed to me. I want that freaking outfit and I want the damn body to pull it off! :D

I absolutely enjoyed Megan Keith's debut novel, Finding My Way. It's an appropriately titled book as three characters stories are interwoven as they try to figure out their paths in life.

Emma is trying to move past her breakup with Josh, her boyfriend of seven years. While preparing for her best friend Kat's wedding, she learns that Josh has begun dating. Once she discovers this, she finally resigns herself to the fact that they'll never get back together, and it's time for her to really move on.

Seth, Emma's charming and definitely attractive co-worker, is tired of the dating scene's revolving door. With a good job, and a great family example, he's ready to meet the girl of his dreams, settle down, and start a family of his own. Emma catches his eye and he's quick to ask her out. Emma's quite smitten with him as they fall into an easy, sweet, and very compatible relationship.

Nick's the playboy that works at the train station that Emma uses every morning to get to work. He's used to women falling all over him, so he begins a friendly flirtation with Emma. Something about her makes him want to be different, but he just can't put his finger on it.

Both men couldn't have been more different, so Emma's nerve-wracked when she finds herself attracted to them both. Seth's the sweet guy who makes your heart flutter, the guy you bring home to Mom, the guy who wants to commit. Nick's the self-described player who doesn't believe in dating.

Who do you choose? And how to you follow your head when your heart's moving in a different direction?

If you've ever had to choose between two men, then you'll certainly connect with this story and Emma's emotional journey in determining how to follow her heart. Having conflicting emotions for two very different men could cause anyone to go a little crazy. Megan Keith puts a new twist on the love triangle as she shows all three POVS, so we can get into the minds of each character. I really enjoyed that aspect because I was able to connect a lot deeper with each one and their relationships.

I'm normally not a huge fan of love triangles. Why, you ask? I usually find that I'm so overwhelmingly on one guy's side, and in this book, I felt no differently. To be honest, I was devastated by the end of this book. I wanted to scream and cry. I had to take a step back and realize that Emma had to follow her heart. The heart wants what the heart wants, reader be damned! :) I can't win them all, I guess! And while my heart was torn in two, I found myself still okay with it. There's a lot left in store for these characters, so I'm definitely along for the bumpy ride!

One thing that was really fun about this book was learning a bunch of cool Australian slang and lingo. The writing was fantastic, and I'm completely impressed with this debut novel. There isn't exactly a cliffhanger here, but the book ends with a big question: **Where do they go from here? I, for one, can't wait to find out.**

Krista says

Overall, it was a great book. The storyline was not centered around 1 person but 3 individuals trying to find their way. The beginning of this story was a bit sluggish until the meeting of Emma, Seth, and Nick.

The description of Seth reminded me of the actor, Oliver James and was a safe character for me. He had a safe job, a safe family, and his mannerism made him safe. I think he was too safe and really tried to please everyone - his boss, Tahlia, his parents, and definitely Emma. I think he was centered on perfection and turned to a child when not achieved. I love his friends and would have loved to see a little more interaction with Seth, Max, Kevin and Rebekah.

I loved how Emma started this book as a lonely single girl and ended as a confident woman! You can see the transformation professionally and emotionally. She grew with her career and her friends and it was amazing! She had some great friends in Kat, Luke, Jake and even Josh. It was great to read about her story and decisions that shaped her into this beautiful, confident, independent woman. I can't wait to see what your other story will be and how she will weave into it.

Nick, Nick, Nick! Oh. My. Goodness. The one person that popped on my head was Dean Geyer. The eyes!! Above the physical, he was the biggest transformation I read in this story. You see it from the bathroom scene with the red head to fighting for Em - player turned boyfriend. The one thing that I noticed was that he was afraid of change. He always referred to Em as a friend and never divulged his intentions nor his feelings. I do love how he credited his change of becoming a better man because of Emma. I know there will be more growing before he and Em can be together!

I completely fell in love with this story line! It's not just about Emma but Seth and Nick and how they start this book shy and inverted and grow through this story. A wonderful read!

chose to review this book as it is written by an Aussie author. What can I say.... I absolutely loved it, though it left me wanting more....

I had a big smile on my face whilst reading it. Author Megan Keith has written such a great first book, full of fun banter between the characters. I loved seeing the different POV's from the main characters-Emma, Seth and Nick.

Emma Taylor has survived somewhat from coming out of a long term relationship, seeing her ex has moved on and being told to get back out there, especially by her best friend Kat, she finally decides to do just that, even though it has been a year since then. What happens with a colleague at her work and with a guy she meets at her local train station will have you wanting to keep on reading.....or at the very least not want to put your kindle down!!

"Now's your chance to date, have fun. Stop over-thinking things and enjoy yourself."

The too & fro of the different POV's are interesting throughout...I loved seeing Seth and Nick's take on things and the way Emma is perceived by them. Nick is a bit of a player...Seth is the guy you want to bring home to your parents. Both guys are really HOT and her friends say that she should go for both and live a little!! I thought Kat was a great friend!! Emma has to help her with her wedding which helps break up some indecisions about the men in her life.

Although Emma does mention her regrets & reminisces about things in the past, it seems she is finally trying to find her way in life!! I was so relieved to know there is another book coming out and am looking forward to reading it. Really wish it was out NOW!!

I really liked this book .. Nice book by an Aussie author.... It was nice to recognise the names of the places being so close to home.. It was nice... Comforting...

The choices Emma was making sounded so familiar .. Two men each different ..one, Seth who she works with and ogles every day and Nick , a guy who she just notices working at at the train station ticket booth ... Both good looking.. There were times in the book I thought noooo don't go that way , go the other , then when she does go the way I thought I right the right guy says the dumbest thing ever .. EVER!!!!!! I have my opinion of both men , I am happy of the ending but after reading a preview to book 2 it looks like that ending might change...

This book was written from three different POV, Emma being the central character , Nick and Seth which I loved ...it was nice to see what they were all thinking at the time or doing in their lives...which is probably why I liked one guy over the other more at the start...

I think in the end Em has grown and found herself from the beginning of the book , the journey she goes through is something a lot of women go through at least once in their lives.. I know I did...

Fantastic reading from the start, just could not put it down. Loved the way it viewed the thoughts of the characters and it made me think about times gone buy. Really hope that the 2nd novel is released very soon, for I cannot wait to read it. Very enjoyable.

Katt Sterling says

I was a little late to the game picking up Finding My Way and I'm kicking myself for it now. What I loved about this book was how...relatable...it was. I FELT Emma. She's a twenty-three year old who has made the difficult decision to end a long-term relationship. That's never easy. What I love about Megan's writing is how she was able to portray that just because you're the one to end a relationship, doesn't mean it hurts you any less.

Having said that though, our girl Emma has options. Oh boy, does she have options. Deliciously, swoony options.

The title fits this book perfectly as it focuses on three individuals who are trying to find their way. Readers are able to walk the journey with the characters and see them transform. Seeing their flaws and watching them struggle made me care about the characters. I felt like I knew them. I felt like I was friends with them. I felt like I could BE them. Again – totally relatable!

Finding My Way is a BIG book, but you know how I could tell I absolutely loved it? I didn't even notice. I was never skipping pages or setting it aside because it felt like "too much." If anything, I became so sucked in by the story I immediately picked up the second.

Finding My Way is such a heartfelt, 5 star-worthy read.

I enjoyed this book a lot.

It was a very relaxing read from beginning to end and it kept me entertained throughout the book.

Megan Keith has written a book that has interesting characters and a good story line that moved along at a very good pace.

It was nice to be able to read a book that you could just relax with and let it take you away to another world.

A fun read.
