Sealed In

Jacqueline Druga

Sealed In Jacqueline Druga

Following a distress call from the state police, Dr. Edward Neil and his team from the Centers for Disease Control enter the small town of Hartworth, Montana. Immediately they encounter a man in a pickup truck holding a quarantine post. His body decimated by a disease like they have never seen. The entire town, population a little under a thousand ... dead. Men, women and children. The unknown germ hit so fast, the town did not stand a chance of survival. But it didn't hit so fast that they couldn't shut down and protect others from what they had.

It is a race against the clock. Not only must Edward Neil discover what wiped out the small town in just a couple days, he needs to determine if it crossed boundaries. The germ is strong, contagious, deadly and fast. If it escaped Hartworth, humanity could very well face an extinction level event.

Author Jacqueline Druga, recently appeared on the History Channel as an authority on terrorism and germ warfare. She discussed the topic of this book on Brad Meltzer, 2012: The End is Now.

Valerie says

Very good

Very well written with an interesting though somewhat distressing storyline. I also like that this is not a trilogy, the entire story is in one book so no waiting for the next part of the story. The characters are well developed & interesting.

Kathy DeWees says

A great read!

Another hit for Ms. Drugs. A very unique plot, that started out one way but morphed into a completely different story than expected. Great characters that kept me rooting for them as I went from page to page. A must read if you are a fan of Ms. Druga's work; a should read if you love end of the world stories!

Ronald L. Toon says

Love this author !!!

This is the 2nd book I have read by this author and I love her!!! I haven't found a book that has held my attention like hers have in many years...she has a way of sucking you into the story without overwhelming you with a bunch of boring backstory...I CANNOT wait to read more of her stories !!!

Joanne says

I shouldn't have started reading this book before I went to bed. All the things stated in the intro are true because I read about them in, "The Hot Zone". The Russians literally created tons of biological weapons and when the Soviet Union disbanded, there were a lot of scientists without jobs. I am almost 100% sure there are biological weapons out there that were sold or hidden away by former Soviet scientists. If so, the scenario of this book could happen any day (and there's that whole Ebola thing going on right now).

I liked how the book went back and forth in time to tell what had happened and what was currently going on. The descriptions of how sick the people were was appropriately ghastly. The book showed how difficult it would be to contain and stop a virus (such as Ebola) once released (Ebola isn't airborne--yet) and the political and economic reasons for not closing down air travel, which are stupid when compared to billions of people dying.

If anything, this book showed how important it is to be prepared for an emergency situation.

Bonnie says

Loved this book. It's a fast paced book about a virus that's unintentionally let out and the outcome. Characters are engaging and the pace is great. Couldn't put the book down!

Mercedes says

This book was so f-ing good...and just a little terrifying. Jacquelin Druga is responsible for more than a couple nightmares. On the plus side though, I'm learning quite a lot about what I'll need to survive the Apocalypse!

Anne says

Very good audio book.

Doreen Dalesandro says

Genre: medical thriller

Rating: 3.0

I listened to this book.

Was an OK read.

Andrew Wehrlen does an OK job narrating.

R L says

Fantastic book!

I LOVED reading this book, it's so good! This author has such a way with weaving a story. I've yet to read any of her work and not absolutely get absorbed in the story. She has many books and they're ALL GOOD! Her work? Highly recommended!!!

Cindy Pickens says

Great PA story! I loved it as I do all of her books

Kathy Lewis says

Wow. I really liked this book. It held my attention and I carried my Kindle everywhere until I finished it. Very interesting and very possible story line. So interesting how the federal govt in the story acted much like I would expect our own to act in the event of a crisis such as this. Watching the bottom line and protecting only those they deem important. Read this book if you are looking for a thriller that holds your attention.

jacqueline brum says

Scarey

This book gives you plenty to think about. It's so realistic that when you finish reading it you want to start planning your shelter and survival strategy. This is so feasible to happen at any time, be afraid.

Lita says

Yep it was good

ok I'm stuck on this author.she had me mad and I cried and then at the end glad. I stayed up all night just to see what will that don't happen much for me. but I'm glad I did.

Margaret says

Sealed in

A great book. It is a realistic account of what could happen if a bioweapon actually was released. Great job.

Donald Franck says

Fearful vision of a dark future

Think of the two worst diseases of the twentieth century and combine them. That is the story the author has told here.
