## Memories of Heaven: Children's Astounding Recollections of the Time Before They Came to Earth

Wayne W. Dyer , Dee Garnes

Poet William Wordsworth expressed the idea that we gradually lose our intimate knowledge of heaven as we grow up, observing that “our birth is but a sleep and a forgetting” of our previous existence in Spirit.

**Dr. Wayne W. Dyer** and co-author **Dee Garnes** had often talked about how the ones who know the most about God are those who have just recently been wrapped in the arms of the Divine: our infants and toddlers. In fact, Dee had an interaction with her own young son that convinced her of his acquaintance with our Source of being. Curious about this phenomenon, Wayne and Dee decided to issue an invitation to parents all over the globe to share their experiences. The overwhelming response they received prompted them to put together this book, which includes the most interesting and illuminating of these stories in which boys and girls speak about their remembrances from the time before they were born.

Children share their dialogues with God, talk about long-deceased family members they knew while in the dimension of Spirit, verify past-life recollections, give evidence that they themselves had a hand in picking their own parents and the timing of their sojourn to Earth, and speak eloquently and accurately of a kind of Divine love that exists beyond this physical realm.

This fascinating book encourages all of us, not just parents, to take a much more active role in communicating with our planet’s new arrivals . . . and to realize that there is far more to this earthly experience than what we perceive with our five senses.

**Very interesting**

I found this book very interesting, reading some of the stories reminded me of a memory I have, where my infant son said something very similar to me. I would recommend this book.

I began reading this book with the assumption that it was Christian based. It is not. It's more along the lines of new age universalism or maybe even pantheism. Jesus is mentioned in the text, but other doctrines are as well.

I was interested in the book because of several things my granddaughter had said when she was very young about how things were when she lived with God before she came to live here. There are quite a few stories of other children sharing similar experiences.

It was an interesting read.

**Westminster Library says**

This was a sweet book! I enjoyed reading the innocent comments that the children make about heaven. The format of this book is unique in that it is just excerpts from letters that family members submitted. They note the experience they felt when the child in their lives made a comment or recalled an experience about heaven.

Find Memories of Heaven at the Westminster Public Library.

I know most of these were taken from the internet.. but they were so short... short paragraphs...and some just seemed like the same thing but changed the names of the children. They were amazing but I wish there were more to the story

### **Leslie says**

Listen to the little children for they are wise with messages of home, if we open our hearts to the possibility.

### **Cassandra Healey says**

This is essentially a compilation of very short statements grouped by category. You must trust the authors that each statement is true.

#### **Very comforting**

I enjoyed all the stories retold and it gives me comfort to know there is something beyond this earthly life. I just finished the book but I know I'll re-read it.

One of Dr Wayne Dyer's life changing books. Love it.

#### **A subject near and dear to my heart**

I currently am the father of three beautiful children, and although I can't say they have had any experiences like those in this book, I do believe their beauty and innocence is truly divine. This book was enjoyable because along with the interesting stories I felt a greater appreciation for my own children's spiritual worth and beauty. In some ways this book is very simple as it is mostly a collection of anecdotes, however the authors did bring up some good ideas of different ways to view our children and more fully appreciate them. Overall I really enjoyed this book.

### **Susan Swiderski says**

Years ago, a segment of Art Linkletter's TV show entailed him interviewing a small panel of young children, and invariably, he received surprising, often laugh-out-loud responses to his questions. He even wrote a very funny book based on those interviews, titled "Kids Say the Darnedest Things."

---

Well, this book is kinda like that... but different. Yes, kids DO say some amazing things, but rather than focus on the funny, this book concentrates on their more profound statements. It's a compilation of worldwide anecdotes submitted to the authors describing what very young children have said about their pre-birth existence, their recollections of God and angels, and also includes some of their unfiltered "words of wisdom."

Some may dismiss these accounts as New Age "woo-woo weirdness," and others may see it as evidence of our undisputed spiritual nature. Me? I think it provides some very interesting and fast-reading food for thought.

This was really more like a 2.5, but since that isn't an option I gave it three. I found the anecdotes interesting, but that is really all it is; lots and lots of short anecdotes, and white space. This book could probably have saved half of the paper it was printed on. It was a fast easy read. Children definitely have lots to say, and we certainly should listen, but this is not the best book ever.

breath-taking. inspiring. sad, yet hopeful.

very well written and documented.

a must read for yourself. no words can describe the feelings this book brings.

### **Kati Polodna says**

I found this at my library when I shelving and flipped open to a page. I was drawn in right away. They're just little stories from around the world about kids and heaven or Jesus or precognition about things they shouldn't know, but it was so interesting. I was up until almost midnight reading it straight through.

### **Cc says**

Pretty dang interesting! Who knew we "picked" our parents. Pretty unbelievable stuff, but it's been documented repeatedly so maybe there is truth to this information. Very fascinating!

### **Nicolette says**

One of the best I have ever read!! I will always keep this book with me!! My mom has always told me from day 1 that I chose her to be my mom and I fully believe that and I am very grateful that she has never tried to stifle or deny my spirituality and the things I have seen and has helped me to embrace those gifts. So I hold

this book very dear to my heart.
