Everything for Her

Alexa Riley

Everything for Her Alexa Riley

USA TODAY bestselling author Alexa Riley's first full-length novel shows just what happens when a strong, possessive man finds the woman of his dreams.

I'll never forget the way she looked, so confident and sure of herself. I watched her from a distance. She wasn't ready for me yet. I didn't approach her and I didn't disturb her, but I never once took my eyes off her.

Mallory Sullivan is ready to start her new life. After graduating at the top of her class, she's landed one of the most coveted internships in the United States. Hard work and determination have gotten her to this moment of living the life she only dreamed of while growing up in foster care.

From the start, I knew that she would be my greatest achievement, so the day I let her go, I set down a path for her. A path to me.

She never expected Oz to be the greatest culmination of those dreams. But sometimes fate determines who you fall in love with. Who makes you lose control. Who owns your soul.

And then you realize it wasn't fate at all...

I've wanted to care for and protect her since the first moment I saw her. I've constructed everything in our lives so that at the perfect moment, I could have her, could give her the life she deserves.

The time has come.

Forget following that yellow brick road because Alexa Riley will have readers clicking their heels in the concrete jungle of New York City as they debut their full length novel that is full of color, vibrant characters, sizzling passion, and of course their signature mark of over the top happily ever afters. ***Clicks heels and chants There's no place like Oz. Well to be exact, there is no place like cuddling with your newest sexy alpha book hero, Oz aka Miles***

So if you are looking for a romance with all the feels and sizzling chemistry, I highly recommend you better get those one-click fingers ready as Alexa Riley will deliver one unforgettable and sexy read in **Everything For Her**. A full review will be posted closer to release date!!

Sophia Triad says

"I've watched her since the beginning."

Let's start from the beginning. Miles Osbourne met Mallory Sullivan when he was 22 and she was 17 at a math contest. She was a contestant; he was one of the judges. She did not even notice him; he became obsessed with her straight away.

And then Miles becomes her guardian angel/fairy godfather but also her stalker/borderline psycho for the next almost 5 years of their lives. He does not approach her straight away because a) she has to grow up and b) she has to be well educated before they get married and breed i.e. have babies.

So his company offers her a full scholarship at the best possible university, Yale of course. He even buys her a friend to look after her, keep her company, send all the potential boyfriends away and report back to him about Mallory's progress.

Later on his company offers her a job. And it is a prestige job. Her co-worker rejected a job from White House in order to work for Miles' company. That kind of important job!

Their Happily Ever After starts the weekend before Mallory starts her new job. Miles and Mallory meet unexpectedly and completely spontaneously (yes sure..hahaha) at a club and they exchange a few words, a few touches and their phone numbers.

This is how "Oz", Miles' new nickname is created.

This is how Mallory has just landed in his land and his magical life where everything she wants, he can make it possible (even change the quality of cafeteria food, because she prefers gourmet sandwiches and salads for lunch).

Up this point I had actually two issues:

1. How come she had never seen the face of the owner of the company who offered her a scholarship and a job – although she knew everything about the company and the programs they use in order to be prepared. I know that I would have searched at least the company history straight away.
2. How come Miles has never visited Mallory all these years (even from a distance), before she starts working for his company. No question about it, Miles is a lunatic and crazy in love with Mallory since she was a teenager. How could he stay away from her and just read the reports from her “best” friend, Paige?

Well, I did not really trouble myself too much with these questions because Miles falling in love all over again and Mallory falling in love with him for the first time are simply a pleasure to watch. I was actually trying to read the scenes with them together as slooowly as possibly. And then rereading some of them.

One thing cannot be denied: MILES AND MALLORY ARE PERFECT FOR EACH OTHER!

Miles knows he is a stalker, but he does not care. He will never let her go.

...Because

“I’ve constructed everything in our lives so that at the perfect moment, I could have her. The time has come.”

...And

“You’re mine, Mallory. I’ll never let you go.”

Mallory starts realizing that he is a stalker and she does not care. She even feels flattered.

...Because

“It warms me that he’s taken so much effort to find out little things about me, adding to the bubble around us. It’s almost like a thrill and I want to hold on to a little bit of that mystery.”

...And

“I’ll take care of you, baby. I take care of everything.”

...And finally

“A sense of belonging and of coming home. It’s as if we’ve both waited our whole lives to get to this moment, and something special passes between us.”

There are a few subplots in the book with Miles and his issues with his daddy dear and also with Paige and her Captain America (I am so looking forward to the next book!).

If you liked this story, I highly recommend the book “Taking What's Hers”, another one of my favorites by Alexa Riley. It has the same level of craziness.

(Actually maybe a little bit more, because the crazy, obsessive stalkers are two in this book)

Val...Shameless.Skanky.B*tchy. says

~~Four~~ FIVE Smut Scale Stars

Sorry I'm so late with this review, folks.

I've been working a lot lately and, well...

Between work, the holidays, and ~~binge drinking~~ household chores, I didn't have a whole lot of free time.

Or motivation, quite frankly.

So anysnuuggle, this book.

All of us AR fans have been waiting not so patiently for this thing - AKA AR's first full length novel - for quite some time now.

But before we go any further, let's be real here...

The male MC in this book is a legit lunatic.

In fact, HERE is where he lives:

Okay, so not really.

He lives in a high rise penthouse, because ROMANCE novel - but still...

Bat.

Shit.

Crazy.

Seriously though, he is a stalker of the highest order.

If I had a friend who was dating him, I would tell her to run to the court house ASAP for a restraining order - *after* we hung out with Sir Stalk-a-Lot and I got me a few rounds of high priced liquid spirit, mind you, but still.

Run homie!

Do NOT pass go.

Do NOT collect 200 dollars.

haha *burp*

But anyguzzle, as I said above...

This be a ROMANCE novel, peeps.

And what might be scary, stalker, psychopath in REAL life?

Is hot as *FUCK* in Romance Landia.

Don't believe me?

Case.

In.

Point.

Perhaps one of the most popular love stores of all time:

Romeo and Juliet

AKA

Yeah...

But anyShakespeareanClassic.

Miles was the total crazy stalker we AR ladies love in our romance novels, and Mallory was - of course - the golden clam vagina that all the boys want to get their man package inside of.

This book was everything we all love and expect from AR, only BETTER.

Granted, it was a bit slower moving at times, but homie don't care.

I dug it.

Because, in the end, it was exactly what I've always wanted from an AR book:

MORE.

More crazy.

More sex.

More BOOK.

In fact, fuck it!

Let's just go on ahead and bump this shit up to 5 smut stars.

I mean, being that it's going right on the "spank bank" shelf that lives in my ~~cooter~~ head...

...I think it deserves it, no?

Regardless.

Well done AR ladies.

I can't wait for your next foray into full length featuredom.

Find me at:

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

So excited to read their first full length book.

The wait for this is killing me.

Cristina | CristiinaReads says

Reading for the second time because I need me some AR this week :)

⇒ ***MY EMOTIONS... MY EMOTIONS ARE EVERYWHERE! This hook has ruined any other book that Alexa Riley will ever write because Miles and Mallory are absolutely incredible!***

⇒ Alexa Riley has somehow done it... she has made me change my mind about reading her books, going from the dislike of her smutty books to her now full novel (and another on the way) full of potential and brilliance!

⇒ So lets talk about the story... WOAH!!! What a HECK of a story this is! Miles Osbourne is the number one definition of Mr. Hot Stalker + Possessive Alpha Male mixed together. The way he controls absolutely anything, and *everything* that had crossed through his path and the path of his one true love, is wonderful to read. The transition between the pov of Miles and Mallory is smooth and very pleasing to read in the beginning of the story. The epilogue is rather confusing and a little scary to say the least because of what Miles is thinking... he wants Mallory that's for sure, but he claims her off the bat when he first sees her at a

college event hosted by various organizations from Yale. He spots her when she was attending Yale University and she was only seventeen, and himself being twenty-two. He sees her, and he absolutely desires her; desires her love, her passion, her voice, her presence, her *everything*. When the time finally comes, and he is able to talk to her after keeping her at arms length, and after five years of yearning her and her presence, he goes and talks to her. He is instantly beyond possessive of her, and to me it gave me a sense of the creeps but at the same time, it turned me on hahaha! He is demanding in a positive way that makes you swoon for Miles and his love.

⇒ ***“When I know you’re near, I can breathe better. As crazy as that sounds.”***

⇒ Mallory and Miles (also known as Oz) begin their love story and they are both instantly hooked. Miles was already hooked that first time he saw her five years ago, and his love for her never diminished, never got distracted by anything or anyone else because he savored his love for Mallory;

⇒ ***“He kisses me so passionately and so thoroughly that there is no room for argument. I belong to him now, and as much as I should be fighting it, I won’t. I’m his, and he’s mine. I would do whatever it took to protect our love, and our possible family in the making.”***

⇒ Their love story evolves through the hard secrets that Miles possesses and keeps from Mallory, breaking them apart but slowly bringing them back together. But no matter how when they fall in love, that love never diminishes- instead, it grows and grows, making them fall in love with each other more and more everyday. That includes the intimacy scenes. They don't f***, they make love. Love in a way that makes you want to crave it, love in a way that makes you cry by just reading it (I will admit, I used a couple of tissues), but most of all- love that will make you want more and more of their story, because that is what Alexa Riley has done. She makes you crave more of her writing. She makes breakfast sex, morning sex, office sex so hot and steamy, I kept heating up every time Miles and Mallory were together!

⇒ The ending was hard to read because I was sure as heck sad that it was coming to its finale of the story, but Alexa knows us too well. She did not just add ONE epilogue... she added THREE! She did not only describe what happens after six months, or after three years- she describes the true love (and lust) Miles and Mallory have for each other after TWENTY YEARS! And let me just say, their love is just absolutely beautiful and breathtaking. Alexa Riley has sure as heck done it, and I can say that this has to be the best book she has written by far...

.....

⇒ Hero rating: 5.0

⇒ Heroine rating: 5.0

⇒ Sexual tension rating: 5.0 (10.0 if I could rate it that way)

⇒ Sex scenes rating: 5.0

⇒ Sex scenes frequency: 5.0

⇒ Plot rating: 5.0

⇒ Dialogue rating: 5.0

⇒ Storytelling rating: 5.0

⇒ Story ending rating: 5.0

ARC received in exchange for an honest review.

4,5

A full lenght novel from Alexa Riley is just what every reader needs! After so many short novellas from this author and after so many complains about them being so short, we now get out satisfaction with Everything For Her. If you've read at least one of this authors books then you know what to expect. Having so many pages to gush about the writing, the romance and the angst is a perfect Christmas gift.

I loved the story from the start to finish. There really wasn't anything that I didn't like, honestly. And that happens maybe one in a five hundrets books for me. There is a reason I'm such a huge fan of AR and they didn't let me down with this story.

The hero is so amazing. But I'm going to be honest, had I met him in real live, I'd run for the hills, since he is so OTT and obsessed with his woman. But that's exactly the reason he makes a perfect book boyfriend. There is truly nothing that he wouldn't do for her. I admit, his original plan of how to get Mallory backfired at him and left him for a few days in agony but besides that, what an amazing hero!

Also, as far as Mallory's character goes, she's just so cute and charming in her own way. She's super smart and really worked herself to the bones to get to where she's now. Since she's an orphan, her life wasn't all roses and sunshine. That made her a fighter. And once she loves, she loves deep. Her bestfriend Paige is an awesome character and together they make a great team. When the truth came out, all seemed to crumble for Mallory but she found a way to move on.

The only thing that I didn't like about this story is the question what happens to Miles's father. I think we'll get the full answer to that in Paige's story. Can't wait to see what happenes between her and Captain, as she calls him.

All in all, I think AR should stick to full novels. Now that we've got them, there's no turning back to the short stories. :)

Lisa says

4.5 Stars!

What do I call the man behind the curtain? I smile as I wait for his response.

OZ.

Everything for Her is the first full length novel in Alexa Riley's new series entitled For Her. I am a big fan of this author and love her over-the-top, sweet stories with possessive male leads and a big dollop of inst-love. For me, personally, I enjoy books that are over the top when it comes to sunshine, love, happiness, rainbows and unicorn farts. I also enjoy Ms. Riley's exaggerated alpha-males who are all about possessing the women they fall for. Every now and again it is nice to read a book with little to no angst and simply take in all the cheesy goodness that is love and a happy forever. That is what this book did for me. It put a smile on my face and had me happily sighing wanting my own hot reclusive billionaire.

Miles Henry Osbourne (a.k.a. Oz) has worked hard to become the sought-after billionaire everyone knows him to be. He goes after what he wants and makes no apologies for it. He's wanted Mallory Sullivan ever since he first laid eyes on her when she was only seventeen. He knows that can't immediately possess her so Miles sets out to ensure that Mallory will be his eventually. He intricately insinuates himself into Mallory's life without her knowledge buying his time so that one day he can finally get his prize.

Told in dual POVs, I loved reading how Miles finally was able to stake his claim. Was this over-the-top and borderline stalkerish? Sure. However, I also understand this is fiction and the crazy ride that Miles and Mallory embark on is simply fun to read. If you have read anything by Alexa Riley in the past, you will know the types of exaggerated heroes she conjures up. Her heroes are larger than life, possessive bastards and I love it.

All in all, *Everything for Her* was a lot of fun to read. I found myself often stopping while I was reading this book to simply take in how much I was loving every word. I love books that make me feel this way. I feel like this author stands out and has developed a unique writing style that is enthralling. Full of wonderfully written secondary characters, a hero in hot pursuit, a heroine who does not see him coming and moments that will simply melt you – this book had it all. I can't wait for more in this series.

"The first time I saw you, I thought I'd woken up in the land of Oz," he says trailing kisses down my wrist. "It was like seeing color for the first time."

"I always liked picturing you as the wizard who saved me." I smile up at him, pressing my palm to his stubble.

"Oh no, Mallory. Don't you remember? She's the one who saved the wizard." He pauses, smiling back at me so big I can see his dimples.

"Anything for you, Miles."

"And everything for you, baby."

Jennifer says

ARC received for review

4.75 stars

It was nice to read a Alexa Riley that had some meat to it.

Miles/Oz was so yummy...hot, alpha, billionaire, possessive, faithful since the day he saw Mallory. He first saw her when she was 17 and did everything to make sure she would succeed and find her way to him. Being a guy he, of course, rushed it once she was done with college and within his realm. There's plenty of hot limo, kitchen, bathroom, bedroom, office sex...repeat. Enter huge misunderstanding, and then there's make-up sex. I kept waiting for one thing to happen since he made such a big deal out of it. There are THREE epilogues, my favorite things.

Now can we please have another book with Paige and "Captain."

Alba and Her Secrets..♥ says

4 'Man behind the curtain' Stars!

Who doesn't know Alexa Riley by now? Let me tell you something about them, just in case. They are two amazing women that write smutty, OTT short stories. They are pretty famous on the novella genre but now, finally, they gave us what many have been asking for: a full-length novel! And it was great start on this new stage in their career.

Everything for Her is the first installment in AR's new series called *For Her* and it tells the story of Mallory Sullivan and Miles Osbourne a.k.a Oz. Now this is no exception to what is normal in AR's stories: it has a couple that falls instantly, a protective alpha male, lots of sexy times and always a HEA. Oz has been obsessed with Mal since he first laid eyes on her and he has drawn her path to him since the beginning. Mallory falls for him too but there are obvious obstacles between them.

No one knows it's been me behind the curtain, pulling the strings. I've constructed everything in our lives so that at the perfect moment, I could have her.

The time has come.

Well, this is definitely AR style! These two ladies do not disappoint with their first novel, especially if you enjoyed their short stories before. Oz is their typical alpha but now we get to see the whole thing. Miles is determined to claim Mallory, he puts himself in her path, she starts working in his company (without her knowing anything about it) and it's impossible for her not to fall in love.

You tasted like peaches when I sucked you off my finger this morning, and it's all I've wanted since. So I had peach cobbler for lunch.

Of course, as you can imagine, the chemistry between the main characters is off-the-charts! Alexa Riley knows how to write the sexy times! Miles is a dirty talker and Mal is a sassy heroine! The man always takes care of his sweet Mallory ;) The sex is quite frequent but it mixes well with the whole love story and all the other moments we get with the other characters.

“I’ll take care of you, baby. I take care of everything.” His hands come up to brush the damn hair out of my face as he licks my neck. “You’re mine, Mallory. I’ll never let you go.”

Now, here probably comes the only thing that stopped me from rating this with a higher rating: Miles himself. I do love AR's alphas but I feel like Oz was the epitome of OTT hero. He did seem, to me, like a full-on stalker sometimes. It's different when that happens in a shortie: it's all fast and I am used to it. But when it happens in a novel? I don't know, sometimes Miles' behavior was too much for me.

“All I’ve ever wanted from the moment I laid eyes on you was to give you everything.”

Of course, leaving that aside, Miles is perfect and so sweet! Now, what I also enjoyed about having a novel is that we get to know the characters better, that we get awesome secondary characters (I can't wait to read Paige's book!) and a plot that involves a secret. Imagine Mal's reaction when she discovers everything: she does not take it well! I was quite surprised with all of that and I really enjoyed it!

***“I’m your weak spot?” I’m not sure how I feel about that. Should I be offended?
“You’re my everything,” he says simply.***

And here is the thing: Alexa Riley always give her readers a HEA. Well, this was their ultimate one because we got 4 FREAKING EPILOGUES in *Everything for Her*. FOUR! I loved it! We get to see Miles and Mallory in different stages in their lives together and I loved having that!

We’ve created something so perfect that it can never be touched. Not by our pasts or by anything around us. Our intimacy has sealed our bond, and my soul is forever entwined with hers.

Therefore, my rating for *Everything for Her* is 4 STARS because it was such a great start for AR in the full-length novel territory! I loved these characters and this love story and I can't wait to read the next book in the series (which will be about Paige and Captain America lol). So, if you enjoyed anything by these two ladies in the past, be sure to check out their first novel!

Geri Reads says

Alexa Riley has been one of my go-to authors whenever I want a quick, sexy, super steamy read. Everything for Her is their first full length novel, and this book had everything long time fans could want in an Alexa Riley book.

Possessive hero? Check!

Sweet, virginal heroine? Check!

Insta love? Check!

Super steamy sexy scenes? Double check!

That said, I wish I enjoyed the story a lot more. I found myself a bit put off by the hero's stalkerish and possessive nature. There are times when I find myself enjoying a possessive hero but there is a thin line there. Unfortunately, Oz was just too much. I felt like he crossed the line by taking away a lot of her choices.

I mean, sure. He provided her with everything she needs (without her knowing it was him) but a cage is still cage regardless of whether it's made of gold or wrought iron.

There are certain things that the hero did which made me uncomfortable. I get the fantasy of having someone there to give you everything you could dream of. It's nice fantasy. I wish I just couldn't turn off this other scenario in my head where instead of a billionaire, the hero is just a regular guy who still lives in his mom's basement. Imagine that guy doing everything this hero did. It's creepy. And having a hot billionaire do it instead of your run-of-the-mill basement dwelling stalker doesn't make it less so.

The whole thing would have been much better for me if the heroine had more choices or acted more independently instead of just accepting everything the hero did. She did feel deceived, and rightfully so. But her acquiescence was too easy. And I wasn't 100% convinced with the reasoning behind the hero's actions.

It didn't end up all that bad. Alexa Riley has such an easy writing style that reading this book was painless. Plus the smuttastic steam was phenomenally hot, as usual. And the sweetness towards the end is vintage AR. I have no doubt AR fans will love this book even if I didn't.

Despite my misgivings, I would recommend this book to fans of insta-love, over-the-top possessive, obsessive heroes. If you love this type of fantasy in your book then Everything for Her is definitely written for you. :)

ARC provided by the publisher in exchange for an honest review.

Bibi says

Waiting. Anxious. Begging.

Most AR fans were in any one (or even all) of these 3 states the minute they heard Everything for Her would be a full-length novel. *Will the plot align with the cornerstone of all AR books? That is, insta-love, virginal h, Alpha male. Can they pull this off?* Enquiring minds wanted to know.

All things considered, this book was done expertly, without forsaking the essence of an AR read.

However, it was a fairy tale. A fairy godfather tale, to be exact. Which isn't necessarily a bad thing except when the story borders on the saccharine. To be clear, the story was neither lacking nor poorly structured rather, I found the theme uninteresting. The poor orphan Annie meets Henry Higgins sort. I never did like Annie. Therein lies my issue.

It appears it's inherently difficult for authors of the Con-Rom genre to veer off script. I particularly wanted AR to do something different from the usual. To date, they've published upward of 65 books (as listed on GR), yet, not once have they deemed it possible to gift the reader with a female who wasn't in financial dire straits or a virgin. **What was the point of writing a full novel which was derived from their norm?**

Then the characters. Mallory and Oz. Substitute Mallory with any of the previous female leads of an AR book and you wouldn't be too far off. Why is it difficult for AR to create a female lead with layers, complexity, friends (more than one), a thought process, wit, self-confidence, and an awareness of the world they inhabit (it's called Google, ladies, use it). *Do you see my dilemma? Well?*

Likewise, the men. Patently one-dimensional. Fuck (excuse me. I mean, making love), breed (excuse me, I meant impregnate), obsess over (my bad. I mean, love). That's it? How about having a conversation? What is the Dow Jones average? Your thoughts on Brexit? Can we harness your wealth for a purpose other than buying me clothes? *What?!!!! NO? You disagree? Oh, well.*

I love a fairy tale as much as the next woman but sex and the buying of clothes and the punching of other men who look at me does not a love story tell, IMO.

So, what if Oz paid her fees and obsessed over her? *Yeah, so?* And ensuring she was safe by employing personal bodyguards? *So?* That she never had to pound pavements or scroll the online ads for a job? *And your point? *sighs deeply**

I craved something that wasn't available. A pulsating love story, but one done with dimension and depth. Sadly, this did not deliver. Altogether, an average read reminiscent of the usual which didn't quite work for me. Please feel free to read this as I fear my opinion is the minority.

Chantal ♥? says

4 EVERYTHING STARS

I'd do anything for her...but give her up.

This book was mostly **everything** the hype said it would be. It was passionate and intense. I loved everything about it.

Miles/Oz was such a protective alpha and it was so sweet to watch his interaction with Mallory, our heroine. **HE LITERALLY DID EVERYTHING FOR HER!**

It was a little nuts to tell you the truth, but in a nice way.

He said so many sweetly intense things to the heroine. I can't quote them all. To do so, would mean I would have to include most of the dialogue.

They are sweet together and this was a full length story finally.

So YAY!

However, I have to sheepishly admit the truth, I felt it had too much unnecessary information and scenes.

For me, the whole drama at the beginning with her discovering the truth was necessary, but after they get together, I felt like many of the other scenes were superfluous.

At one point, I was just tired of reading about the office drama and other small events like her getting dressed. (Honestly, it was starting to sound like a Harlequin at that point and not an Alexa Riley story).

These are my only issues with this book, and the only reason why it lost a star.

It had an nice epilogue.
(view spoiler)

Worth a read and maybe a reread sometime. You know when you have a failed alpha book. This may be a good comfort read.

Now, I am so very glad I preordered her next full length book. These two are going to be EPIC! Chemistry is off the charts. Paige and Ryan/Captain I am seriously waiting with baited breath for your story!!

Completely safe without any issues here NONE!

Totally random thought here, I often wonder why fictional couples, who want large families, never adopt!? Seriously, these two had a lot to give a sweet unwanted child. Just my random thought.

Kelly (and the Book Boar) says

Find all of my reviews at: <http://52bookminimum.blogspot.com/>

If you're looking forward to a rant to go along with this rating, you're going to have to look elsewhere. Let me state for the record that I am a firm believer that porn is 100% fantasy and if a certain type of storyline works out for you (or even better for both you and your significant other), well then you should read whatever the hell you want. That being said, now that I've read a handful of Alexa Riley novellas as well as this full-length feature I can officially state that AR's fantasies are **not** mine.

To begin with, this is about a stalker who gets the girl. Now, I have totally loved a story like that before, but it didn't make me wanna jizz in my pants. It made me think that I probably should create a GoFundMe page in order to get the psychiatric help I obviously need. Buuuuuuuuuuuut, when the leading dude's name is Miles and he looks like this . . .

It's apparently A-Okay to want to bang him even if he's a creepy mah fah who has been the puppetmaster of your life since you were back in high school. Unfortunately for me, I couldn't get on board and kept hollering stuff like this at my Kindle . . .

I don't want to waste a whole lot more of my life on this book, so let's run through the tired out tropes that Riley can't get enough of real quick. Dude's not only a super creeper, but also a millionaire. This time he owns a company called "Osbourne Corporation" and if **that** isn't a clue he's going to be kind of fucked in the head, than you haven't watched enough Spiderman movies . . .

The leading lady has curves in all the right places and enjoys fancy underwears because they give her **"the**

sense of being a superhero.” Ahhhhh yes, much like my underpants do for me

He has a signature scent. This time it’s *“warm amber and honey”*

She’s a virgin, she rarely sits in her own chair because his lap is so readily available and they also conserve water by only eating off one plate/using one fork at any time (and OF COURSE he feeds her because her arms must be broken or something) which are things that make me go

AlIIIIIIIIIIIIIIIIIIIIII of which led up to the ultimate Kelly and Mitchell dealbreaker that is the *“fill me up with you”* talk

If this is your idea of a fantasy, more power to you, but it dried my ladygarden out like the mothereffing Sahara so I think it’s about time I call it quits when it comes to Alexa Riley. To all my friends who love her stories

EDIT: Because I literally JUST typed I was breaking up with AR and then discovered Paige's story might be the next book and YES I WILL TOTALLY READ THAT BECAUSE AM A SHAMELESS WHORE : (
