I loved this book in ways too many to count. It's this kind of book that keeps me reading this author. When she gets it right she's perfection itself. And this is Ms.McCall at her finest. I cannot wait for the next in this series.

Pamela(AllHoney) says

The first book in Dinah McCall/Sharon Sala's *The Prophecy* series. Native American Layla Birdsong is in New Orleans and gets lost. She is then attacked by a gang and fights back. But a strange whirlwind appears and saves her life. This is caught on video and there are people who want answers. What was that whirlwind and why? But Layla is told she has a purpose to save her people and must go to her home in Arizona and prepare.

This was not what I expect from Ms. Sala but it doesn't mean that it is bad. It was different and I did like it. I guess what bothered me was the whole "End of the World" business. Still it was intriguing and I would recommend it with reservations. There was not a cliffhanger but the second book continues with Layla's daughter. Curiosity has me downloading the rest of the series.

Randy Daugherty says

Layla Birdsong is attacked by nine gang members but the tides turn when she attacks back, as she struggles she hears drums, then a strange wind comes up but it only goes after the attackers, leaving the dead in its wake. She hears a voice saying you will know me and you will love me. Layla learns she is a Red Feather Warrior, chosen for the task at hand, a change is coming and she must be ready.

The change is a meteor hurling towards earth, a FireWalker, coming to cleanse the earth, the people have forgotten their ways, the young ones dying in the streets. The Windwalker has come taught her the skills and given her the love she craved saying she would see him again and she would love him.

For now Layla must lead all the tribes that have gathered to safety, a place opened up by the Old Ones, a place and time that will change history in the future, prepare the People for the coming of the whites, if only Layla, now known as Bird Song can get them through leaving none behind.

This was a great story line mixing various myths and legends into a strong tale with a strong character. I look forward to finishing the series.

This was a quick read but was a very different type of story. It had threads of the paranormal mixed in with Native American mysticism. I enjoyed the book and would be interested in revisiting the characters in future stories to see how they've all fared.

Rowena May O'Sullivan says

I loved this book. But then I've always been a Dinah McCall (Sharon Sala) fan. I wasn't disappointed. It was a fantastic blend of contemporary romance, mythical American Indian with time-travel involved. It was kinda weird that the week I chose to read this book was also the week that the Mayan Calendar indicated the end of the world, as the end of the world was the focus of the drama unfolding for the hero and heroine as they worked to save their kind and to change the past to ensure a better future for everyone.

While I did like the novel, it was kind of creepy in some ways. The second installment of this series comes out in 2013 and is called The Dove. I do not think I will be continuing on with this series. While it was a good read and there was many different aspects of the novel, I did not truly like it, nor believe in it. I know the legends of the Cherokee and Navajo and to some extent I do find them interesting, that was the whole reason behind reading this novel because it was based on some of those 'facts'. I just found that it isn't my cup of tea, with all due respect to the author.

Pretty interesting read but very different. It's got a lot going on: Native American, contemporary and time travel. Kept me interested, but I wasn't crazy about the ending. 3.5/5

Windwalker Book 1

This is my first time to read Sharon Sala's writings and I must say it was most exceptional. I felt that I was with the tribe going through the door and traveling back in time. At times it took my breath away a beautiful story I am anxious to read book 2.

Karen says

Awesome Book!! This is a paranormal that has the theme of Indians that I love.. Very well written and wonderful characters..Highly recommend this book..

A Race Against Time Windwalker

A Race Against Time Windwalker
The Prophecy Series
by Diana McCall

Windwalker enthralled me from the beginning to the end. The legends of childhood come to life as a Red Feather Warrior grows into her own. I loved the way McCall wove old ways and ideas into new. She took people out of time and moved them into history. The thing is once the character grows into her own she takes the steps that are going to change the history of the World and the people that she fought so hard to save. It gives a new perspective of what happened to the old ones of the Southwest and how magic, love, and legend can change everything.

I enjoyed this book but it certainly went in a direction I didn't expect. Looking forward to the sequel.

This is Dinah McCall's first book since the release of The Survivors in 2006. She quit writing after her fiance's death in 2005 and this is her first book since. It's a Native American paranormal romance and the first one she self-pubbed, although she has many under the McCall name with other publishers.

Ann says

I enjoy most any book where there are Native Americans involved. This one is about a girl who was shifted to another time frame by a windwalker. She was to save the tribes and save them from the enemies . She would hear when they are coming and she had to lead the people. Some may die some may not be able to follow. The sun was so so hot for everyone. They finally reached their destiny. She became the wife of man there. Everyone that followed her looked at her as a leader who saved them

from death. Eventually someone from the other side tried to find them and kill her but with her husband and the 3 little boys that had to grow up so fast will save her and her unborn child.
