Craig Werner says

A good year for the Prospectus, now fully recovered from its descent into statistical minutiae a couple of years ago. The essays are all written by team followers who maintain a nice balance of homer perspective and quasi-objective clarity.

The bummer was the Dodgers essay, which makes a convincing case for the likelihood that the Evil Blue will continue to be good, and possibly great, for the next three decades or so.

The Rockies essay is fun, fitting for the year and our hopes for the future. The Pirates essay would be even bleaker if it had known Cole and Cutch would be gone. The Brewers nicely balanced.

Best essays: White Sox, Indians, Rockies, Angels, Dodgers, Cardinals, all of which engage with the rise and fall of franchise strategies in juxtaposition with the current state of affairs.

Player profiles great as always.

Mayor McCheese says

Used to read these every year. Took a break for a few years. Still excellent resource, but the writing is not as crisp. The player profiles are still interesting and funny but the team profiles are less interesting, less comprehensive in my view.

Nick Pearson says

The latest edition alternates between great essays and flights of fancy that leave the reader wondering where the analysis of his favorite team is. Player comments are the same mix of funny and sincere, though I'd like a small blurb about what to expect with regards to fantasy baseball impact, with each player. Basically the same annual it's been for as long as I've been reading it.

Bob Ryan says

All the information you could want.

Jake says

Always a great combination of math, Simpsons references, and baseball, I could ask for nothing more.

David C Ward says

I read this by dipping into it since the depth of coverage and the statistics are overwhelming. Nothing like it really in terms of the new way we look at baseball through stats. I give it five stars for coverage and for being a pioneer but an overall rating of four because I think the team essays are uneven in quality. But as I said, there's nothing like it. And it's a first sign of spring in February (snowing outside).

Andrew Ford says

Busted ass to read this by Opening Day, even though there's a wealth of stuff that isn't up-to-date, and the scouting reports and essays on each team (as well as their top prospects) remain invaluable. As a bonus, there's even a mini-prospectus on players from the NPB and KBO leagues.

One minor note - the KBO pitcher write-ups are entirely disordered, with the blurbs below the stats in the page layout being for completely different players, and not even necessarily in a solvable mix-and-match sense. This is true of both the print and Kindle versions, if anyone's curious. Not a major concern, just something to be aware of.

Allen Vaughan says

Better essays this year. I look at it all season.

Bill says

Good background on current players and top prospects as I follow the Houston Astros and their opponents.

North Landesman says

Glad to have this thing back in my life every year. Enjoy Gleeman, the writing, and the depth no other publication has.
