This book is really good book for beginners and just beginners! I didn't know anything about divination, so this book was very handy. It doesn't go in depth into many details, but as i said, it is for beginners. You can learn a bunch of stuff here like how to know your future with stones, birds, candles, tarot, etc...Highly recommended ?!

An excellent source of information on so many different forms of divination. If you are unsure of which form you wish to try out, I definitely recommend picking up this book!

Excellent info.

Good for the beginner. Goes over a brief summary of how things are used in Divination. I guess I was expecting more. I am a beginner but I would have liked a more in depth guide. But I guess this helps to learn the different ways to do Divination.

A reference. Some interesting ideas: paper divination by boiling rolled paper, the one that unfurls first is the affirmative.

Edeline Ravenel says

clear and relevant. I really learned a lot that it is historical side as practical!
