Carrie says

This is a practical tool for educators who need more effective strategies to help children who have autism learn as best as they are able. This was a required textbook for a class, the instructor was very knowledgeable in research based programs.

Maureen Pettengill says

It's a text book lol

Sue says

This a required text for one of my credential courses. It discusses strategies but provides few concrete examples. I find myself using my other textbooks for assignments because they are written better.
