Keri says

Basic behavior management.

Todd says

Best intro to working with autism still

Angie Lee says

Great book to help set up guidelines for children with autism and how to structure productive engagement

Laura says

An excellent guide for using ABA (Applied Behavioral Analysis) at home. In addition to a good curriculum guide, this book discusses using ABA strategies in real situations (beyond "table learning"). The sections on toilet training and working through disruptive behaviors have helped us a lot. I refer to this book often in working with and teaching my son.

Adria says

Great resource

Jean Brazil says

good overview of aba and gives a good direction of where to go.
