This volume brings the fight between Nadil and the Dragon Lord to an end, for now. As the clever villain that he is, he uses his demon followers as an advantage to threaten Cesia that if she comes back to him then he will leave the Dragon Clan. That was cliché and predictable as ever and Rath is brought back alive by Kaistern's death which still leaves me very confused about Rath. (By the way, was I the only one who was disturbed by the fact that Cesia and Rath were just chatting away as if it was just an ordinary day while a battle is going on in the castle grounds. It's like you taking a snooze in your bedroom and there's a shooting going on in your backyard.)

Apparently he needs a 'life force' and Kaistern had to give up his own in order for Rath to have a new life force. Of course I'm still confused on how that 'life force' works. But then it tries to explain Rath's backstory and his connection with Kharl with this little chapter at the end which makes no sense if you read it for the first time.

If I first read this chapter the most I could figure out was that after the Dragon Lord rescued his queen this demon went around the land and killed several creatures and because it looked like the Dragon Lord's dead pet Illuser, the Dragon Lord couldn't kill it and transformed the demon into his blood brother which turns out to be Rath. At first, I didn't get it but then I understood why Rath is the Dragon Lord's blood brother. It is because the Dragon Lord gave the demon his blood and turned him into a member of the Dragon Clan. The backstory was interesting and had a few comedic parts to it and that really was the only interesting thing in this manga. The battle was surprisingly boring. But I'm going to guess that it is because it wasn't the main focus. So yeah, this volume was 'meh'.

The main turning point of the whole series, this is where the story turned from light-hearted fantasy to a dark and seemingly unreachable ending.
