Jacqueline says

extra 1/2 star

There wasn't anything actually wrong with the short story...except for the fact that it was entirely unnecessary and wasn't anything more than a scene...

Kitty says

There was no story here. At all. Pretty pointless, actually.

Louisa says

Loved reading this collection of short stories again, they gave us little glimpses of this world beyond the big plotlines, some quiet moments, or one off moments! Great read!

First read July 3rd, 2016

These short stories were just so great to read! I do wish that I'd gone to each individual one to know where they were in the timeline before I read any of the books or stories, but oh, well, it was fantastic to spend this extra time in this world, and I can't wait to devour more of this series next week!

Tammy Kesteloot says

Worth reading... but glad it was free

Paris says

This felt like a typical Beezle moment in this series.

Aly is so frigging bored says

That gargoyle is funny

Marianne says

Meh. A short intro to the intriguing Black Wings series. Luckily, i didn't read this story first, or I might

inadvertently have skipped Madeleine Black's adventures altogether. 2.5 stars.

Ivy says

This story was very enjoyable. I am starting to become a fan of Beezle. Having a job as an Agent of Death would be really interesting. Poor man that died.
