Hitched to the Heir: The Billionaire's Bride Ella Slade

He's the silver spoon boy.

Money, looks, status. He's got everything.

So why would he want to marry...her?

No matter where she looks, **Jasmine Molina's** life is hard: her mother passed away, her brother is fighting overseas, and all she has left in the world is a drunken gambling addict for a father, a man who steals her hard-earned tips every time there's a "sure thing" at the track. Behind in her tuition payments and the utility bills, the last thing Jasmine needs is a spoiled-brat rich kid making her life miserable.

But that's exactly what she's got.

Gage Kingsley and his gang of snotty fraternity brothers have painted a target on Jasmine's back, and they take special delight in picking on her daily. But when they show up at her house in the middle of the night to collect an overdue loan from her father, Gage and Jasmine's worlds truly collide.

There's only one way out... accept Gage's offer of marriage, or watch her father die.

Jasmine is living her life the best she can, she works hard to pay for rent, bills and her tuition for school. Since her mom passed away and her brother is off at War, its just her father and her.. But her father has some gambling problems, which doesnt work for Jasmine when he steals her tip money to gamble away. She pretty much is the Adult in the family. Gage is the biggest jerk on campus and can get away with it because his families money has built half the town as well as buildings on campus.

What I enjoyed most about Hitched To The Heir is watching a Guy going from being totally immature to actually growing up and trying to be a better man, wanting to be a better man because of Jasmine. A relationship that looked doomed from the start, both getting into a fake engagement and Marriage for their own gain. A relationship that grew and both really enjoying spending time together inside of bed and out as well.

This book is fantastic, a quick, easy and entertaining read on every page. This story has a boy who has always treated a girl like crap, always picking on her at every turn, and a woman who has dealt with it. A father who has so many debts that his daughter has to do the unthinkable and marry the man to get him off her fathers back, while it will also give her the thing of never having to worry about paying bills etc again. A love story! If you like stories like this, then Hitched To The Heir is a must!!

It could've been good.....

This as an awful book. This has an interesting plot but executed badly.

My main issues (spoilers):

The way Gage acted in the beginning was way too immature for a college age man. Throwing paper balls at Jasmine in class? Bumping into her so she spills her coffee? Ridiculous. That is grade school stuff.

Then this immature brat turns out to be bookie? Ridiculous.

Then completely out of the blue he comes up with "marry me for your father's debt.". The benefit for him is that it will show his parents he is responsible. His parents didn't even seem to care about his bad behavior but we are to believe they were threatening his inheritance? Ridiculous.

To me the top of what irritated me was the girl at the party. So Jasmine lies to Gage and says she has work while planning to go to a frat party. Silly since she pretty much knows he will be there. When she finally see Gage he is sitting on a couch with a girl straddling him. They are making out with his hand up under her skirt. This is way, WAY too far in the book for this to be happening. They are already living together, engaged and being intimate every night. Why is he cheating on her? No reason is given...even after Jasmine confronts him. It is then brushed under the rug and they kiss. Gross and ridiculous. I was pretty much done after this scene but I continued on hoping that all this would be explained...have some reason. Sadly it didn't.

I could go on and on but I hate typing on on kindle so I will wrap this up.

Last towards the end Gage gives his 'I love you' but in the same paragraph he says that he hopes their marriage works out, that he will try his best. WHAT? I read a ton and that was the most unromantic declaration I have ever read. But WAIT the next chapter Jasmine declares herself and guess what??? She also says that she doesn't know if it will work out but she is going to try. This is the same paragraph as her first I love you.

So what did I think about this book? It was ridiculous.

I listened to the audio book of HITCHED TO THE HEIR. While I loved how the narrator brought Jasmine and Gage to life. Loved their voices, the intonation – everything. But outside of the dialogue...? I found the narration exhausting at least. There was this terrible up and down in her voice like she was simply rattling it off to be over and done with it. I found myself constantly rolling my eyes – like I said, it was a bit exhausting.

The plot intrigued my from the very beginning, because I absolutely love a good blackmail story. But somehow the execution fell a bit too short, the book over too soon. Gage was the type of bad boy your momma warned you about. A hot, domineering, take-no-bullsxxx alpha male. He really did bully poor Jasmine a lot, even if it was only something childish like throwing paper balls at her. Then he turns out to be her father's bookie – which was hardly believable after witnessing his behavior in college. Somehow these two personalities did not mix. And then he blackmails HER into marrying him because of HER FATHER'S debt...? Seemed hardly fair to me, especially because this action seemed kind of drastic for such a comparably small amount of money that was owed.

After that, everything even seemed more rushed, but then came the epilogue, which I really adored.

That being said, I enjoyed the story, but it had so much more potential.

Mindy Lou's Book Review says

Hitched to the Heir is a short story about girl struggling through college because she is forced to take care of her dad who is a gambling addict. Jasmine is woken up one night hearing angry voices asking her dad where their money is. Jasmine intervenes to find out her dad's bookie is the rich douchebag who makes her life hell at college. Gage is an immature rich college guy who is trying to make money on the side because his family is threatening to cut him off. He sees the perfect opportunity to show his parents he has matured by bringing home the smart college girl as his fiancé. Gage offers Jasmine this role to pay off her dad's gambling debts as well as putting him through rehab and pay for her college. The offer is too good to pass up so she agrees.

This was a cute short story that felt just a little rushed and I had wished the characters were a bit more mature. It had a great ending/epilogue.

ARC gifted by author in exchange for an honest review.

Marcia Lancaster says

Jasmine is an A college student. She works hard in school, works hard in a restaurant to support herself, her home, her dog. Pays her tuition, pays her bills, puts up with her drunk, gambling dad, and tries to have some sort of a life aside from school and work.

Gage, on the other hand, is a rich privileged underachiever who doesn't accomplish anything, except party and play, oh and annoy Jasmine every chance he gets. A guy has to have some fun, doesn't he? Gage has some other extra-curricular (outside of college) activities that bring him into direct conflict with sweet unsuspecting Jasmine, and the blackmail begins.

Jasmine is now the fiancée of a very rich young man. His coldly, calculating, suspicious mother is on the prowl and the game is afoot. The leaps of faith keep coming, the questions keep rising, and you keep reading wondering what's going to happen next. I enjoyed the characters' growth as the story progressed in time. It was believable. Enjoy their journey, I know I did. I received a free book for an honest review.

I was given an ARC for an honest review. This was a fun book. I couldn't seem to put it down so I stayed up pretty late to finish it and I was not disappointed in the HEA ending. I won't retell the story since there are numerous recaps of the characters and the story line. I will say this book had a bit of everything. There were times I found myself laughing, times I was angry, times I was disappointed, and times I was a bit sad. Overall, though it was an enjoyable read. Some of the events were very believable while others fit right into the fiction category which is, after all, part of the joy of reading about make believe characters and life situations that may or may not be realistic. The match up of two people who initially did not appear to like each other was fun and produced some entertaining dialogue and interactions. The very different backgrounds of each character was well written and gave me something to ponder as I imagined what a huge cultural difference there can be with two people and how love can certainly bridge those differences. Perhaps my favorite part of this book was the idea that Gage recognized Jasmine's intelligence and her strength. He might have teased and tormented her a bit but underneath it all, he got her and for me that is romance!

Linda says

Gage is the rich, nasty college boy who along with his friends constantly picks on poor but admirable college student Jasmine. Then he hits on the idea of blackmailing Jasmine into marrying him in order to impress his parents, thereby securing his fortune. I had a couple of issues with the beginning of the book. First, that he's a bookie threatening Jasmine's father with bodily harm if he doesn't pay up. He's actually pretty cruel and despicable, not to mention criminal. Second, picking on Jasmine was so juvenile I couldn't believe it. However, once I got past that, I was able to actually enjoy the book. Apparently he gave up the bookie business because he doesn't seem to be involved in that through the remainder of the book. Gage became a lot more likable and in fact it was hard to reconcile the character from the very beginning with the reformed character through the remainder of the book. The romance evolved nicely with some steamy sex. I definitely would definitely like to read more by this author. I was provided with a copy of this book in return for an honest review.

This short, new adult book was an interesting listen. The book started with Jasmine and Gage in college, at odds with each other. With some unfortunate circumstances, Jasmine and Gage meet again and their relationship really begins. Their love hate relationship is entertaining. There is a lot of banter between the two. We learn a lot about Gage and why he acts the way he does, and what he is really like. Jasmine I found to be pretty transparent, she is who she is. There are a lot of family interactions, Gage's mother is a total witch, Jasmine's dad a gambling addict and her twin brother, Nick, the military man who is very chivalrous. The story was fast paced, their relationship moving quickly, the scenes steamy and the happily ever after predictable. I found it to be an enjoyable read.

Meghan Kelly brought this book to life for me. She is the perfect voice for new adult books, and was able to keep me listening and focused on the story.

Not too special.

The girl being blackmail to be his wife of convenience or her gambler father will suffer. Found out that the boy is the shark loan whom her father borrow the money from.... :D

Due to an incident in the book, I would say this isn't a safe read. Gage is certainly a jerk at first. He does end up redeeming himself in the end. I agree that it did feel rushed.

AUDIOBOOK VERSION:

NARRATION: 5

STORY: 4

Great book~ I thought the writing was great~ The Narration and production was fabulous! The story was great once you got over being blackmailed into marriage~ It really didn't bother me as I loved seeing the love blossom between the two. Whether it started out fake or not- the love in the end was real. I thought it was great and would gladly read more from this author. As for narration, I am a big fan of Meghan Kelly's work. Production value is always high. She has an amazing voice and really does the books justice with the feeling she puts into her readings. Great job all around.

Ruby McDemon says

This story has its funny moments, its sweet moments and its sad moments, but it is wonderful. I really enjoyed the back and forth between Jasmine and Gage. These two come from completely different worlds and seem absolutely wrong for each other, but that's a great thing. I really enjoy the two of them getting to get an idea of what life is like for the other-half and grow and change into better people (mostly Gage). It was great watching these two move from enemies to friends to a true couple. Meghan did a great job narrating and made it easy to get lost in this story.
