I started reading this book thinking it was purely a fluff romance novel and my brain needed the break so I dove in. Well I was wrong, unless somewhere along the way(thank you Lifetime) sickos kidnapping children became romantic.

Its too bad too, because I loved the Calder family, Culley and Logan. I wanted to watch that unfold more. I loved the back and forth between Cat and Logan. I really enjoyed the closeness Cat had with Culley and the fact that Culley always did what Cat needed even if it wasn't exactly what she wanted. He never broke a promise though.

The bad family were just over the top sick. Do people like that exist? Yes probably. Do I want them in my romance novel? heck no. Lath makes your skin crawl in every scene he is in. And then we don't get to enjoy his death. Weak.

I am soooo glad I read this book and after the last book I read before this one I was really worried I would hate it. We pick up from where we left off after the Heroines Cats mother dies and so does her fiancé. Cat does something reckless and has a one night stand with a hot dark stranger who just fall for Cat and is too worried about being the sub for her dead fiancée to come to her after. She of course gets pregnant being a virgin this is always the way. I loved that he was so sweet with his son and not forceful with her even though she kept his son from him. He wanted her love and a family. It was awesome how when they get together again he just wanted to hear his name on her lips and it was like coming home for him. I could feel the longing in those words it was powerful. This book was amazing. Loved loving and love it.

Review: I really enjoyed this book very much. I loved Cat with her spunk and Logan with his smoky gray eyes. They were great characters.

This is shallow read, glamourizing the ranch/country lifestyle. While the initial story line was pleasant, (good girl in mourning decides to get reckless as part of her healing, accidentally becomes pregnant and then meets up with the father of her baby several years later), the plot/climax was silly and not very believable (ex-con takes revenge on the #1 family in the area). I was surprised that there was no mystery in who the villain was.

What caused me to raise my eyebrows, is that the heroine is painted as a strong, independent woman in the beginning of the book, but changes into a weaker, and dependent woman once she is in a relationship. The old fashioned shotgun marriage, "man & wife" statements, giving up both her and her child's last name as well as moving from her home without much discussion, were concerning for a book written in 1999.

The heroine also changes overnight from someone who dislikes her current situation, to someone who declares themselves to be totally in love. There is no journey, no questioning or exploring what their new

found relationship means to their previously declared temporary marriage, just an assumption that it has moved to a permanent status with plans for future children.

The final climax scene ends the story, leaving a few details in limbo.

Cat Calder is a Calder though and though, stubborn, proud, intelligent and slightly haughty. When her fiancée is killed in a car accident. Cat spends her last night at school drinking and then in the arms of a stranger. Nine months later she has a baby.

When Logan Echohawk comes to town she is in major trouble. He happens to be the stranger and he has not forgotten that night any more than she has. How does Cat preserve her first love and come to grips with her developing love for Logan?

Calder pride is a love story in the series of love stories about the clan. A nice easy read.

Wei Cho says

Logan, the one man I love from the start. His smoking body and piercing gray eyes are to die for. He is the type of courageous, macho man that knows how to handle situations and fear. Cat falls in love with him, who wouldn't?

It was a good book, very romantic and moving. It exemplified and glorified the ranch estate and lives though. Cat Calder wasn't a constant character. In the beginning of the book she was strong and independent, but once she fell in love with Logan she became weak and dependent. Very cliched with the women becoming submissive to their husbands when they fall in love. Cat became submissive and in love from one day to the next, having no room for personal development and for the love to grow between them. It was almost systematic and planned.

Also, the story seems simple, plain, and bland. When the bad guy of the story goes after the Calder family, nobody suspects anybody else. Making it not a mystery or anything else. The thrilling moments lasted very short because there wasn't anything to wonder or be thrilled about. The chase wasn't exciting and what happened in the end was kinda expected.

I like this book for the romance Logan brought to the table. He is so sweet, the kind of man that would protect you and love you forever. Cat is so lucky XD!!!

Lee says

Cat Calder is Chase Calder's daughter. Tragically her fiancée is killed in a car accident and Cat decides to travel to Texas where the family roots are to try to regain the strength to go on. One night spent with a gray-eyed stranger, finds Cat pregnant and she goes to live with her Aunt Catherine in California to have her child. Now that she's got her life under control she decides to raise her son Quint at the Triple C Ranch. Five years later, while running errands in town she meets the new sheriff, none other than the father of her child.

Cat tries to avoid Logan Echohawk in an attempt to keep that information from him.

usually this theme is done in the 1800s, and i didnt like how this played out in modern times.

i didnt like how she slept with a stranger either.

and then when he comes back into town years later, and finds the kids age out and the fact that he looks like him, hes like who's your mother? really blase about the whole thing.

usually the guy is like omg i have a kid.but this one barely reacted.

the whole somethin somethin "calder pride" was kind of annoying to read.

&then he convinces her to marry him,which would work in the 1800s, because women couldnt really raise a child alone, but in modern times, women dont need men to support them.it was annoying how she just went along with it.it sucked the romance right out of it.i mean you dont just marry nowadays.

&then there was a predictable "threat on your life" in here. of course. when authors dont know what to write about,they have someone threaten their characters life.which is usually done in a weak way.

Another installment in the life of the Calders. This was a pleasant read. I enjoyed the story line very much.

We have here the story of Cat Calder, daughter of Chase Calder. Upon arrival back home from college, Cat is hit with the devastating news that her fiance has been killed in an accident. Cat mourns for Repp and decides she is not going back to college. She goes to pick up her things from college and say goodbye to her sorority sisters. They go out on the town where Cat encounters a handsome gray-eyed stranger at one of the bars. She is drawn to him and he makes her feel alive again. But that one reckless night with the handsome, gray-eyed stranger changes her life forever -- and gives her a son with striking gray eyes.

Cat decides to raise the child on her own, but the town treats her as an outcast when they learn she is an unwed mother. Cat is gossiped about meanly, and it takes all her pride to hold her head up and ignore what she knows is being said behind her back.

Just before her son Quint's fifth birthday a handsome new Sheriff, Logan Echoheart comes to town. But Cat cannot ignore the new sheriff. It isn't his rugged good looks that cause her heart to skip a beat when he first arrives in town -- it's his striking gray eyes. It seems impossible, but the man she never thought she would see again is now a part of her life.

Cat finds herself torn between her promise to her first love Repp and the powerful, unexpected feelings for her child's father. Cat must decide: Will she take a chance on a new love?

this is the second time i will be reading this. i would have given it 4 stars on my first read, but now, i see lots of loopholes in the plot. Denise, Central patron, June 2017, 5 stars:

It is part of the "Calder" series. It is about the new sheriff in town finding out he is a father. It is an intrigue romance. I like the books that are part of a series. They continue the stories!!!!
