Fantastic ending. All the little bits wrapped up. Loved this series so much happens its a roller-coaster of a ride!!

Serena Yates says

This final volume held me spellbound from the first page, just like the previous three. AJ and DJ have spun a tale of tremendous imagination with these four volumes, and while there are parts of it that I personally found a little too violent or too bloody, on the whole I loved the series.

The first two thirds of Apocalypse describe the final (unexpected) stage of the vampire/human war as Carden meets his destiny, leaving Rory behind for the last part of the fight. The last third of the book can only be described as 'pure torture' as I hung on, hoping for a happy ending. I'm not going to give anything away by saying that AJ and DJ had me biting my nails up until almost the last page.

Bravo!

Love this series

L-D says

This book was pretty damn depressing. The MCs have to go through a LOT of sh-t before they get their happy ending it seems. I can't say much without creating spoilers, but I was biting my nails waiting for the outcome of this one. Another good book in this series and finally a happy ending.

Betryal says

Holy shite! The books to this series just keeps getting better and better and always with a newly added twist that keeps me on the edge and just blows my mind!

Lee Brazil says

I'm never sure which way to go with stories that surprise me. But this one is an emotional roller coaster, and that I love, even though I often felt bewildered by what was happening around me as I read it. I laughed a little, cried a little, cursed a bit. Great read.
