Cowboy's Bride Barbara McMahon

When Kallie Bonitelli inherits a ranch, she's thrilled--until she arrives in Wyoming straight from Boston and runs into the very man who wants her ranch--and her gone. Determined to learn all she can, she puts up a good front that she's staying and going to run the ranch. But cattle, horses and ranching in general is far from her expertise. Is Trace Longford helping or sabotaging her efforts to learn all she can? She can't believe she's falling for the cowboy who wants her ranch. Can they find a way to both get what they want? Or is Trace right--she's a city gal who needs to go back home and leave the ranch to the one who can best run it?

Great story, loved the story line behind it, just wish it didnt end so suddenly. Could have played out another chapter or two before the epilogue. Overall it was a good rrad.
