Louie Giglio

Indescribable: 100 Devotions for Kids About God and Science Louie Giglio
Discover the Wonders of the Universe *with* the Creator

It's impossible to out-imagine God. He orchestrates time, creates light, and speaks things into existence—from the largest stars to the smallest starfish. God is a powerful, purposeful, personal, unparalleled Creator.

Psalm 19:1 says, “The heavens tell the glory of God. And the skies announce what his hands have made.”

Indescribable displays the majesty of creation with scientific findings, photography, and original illustrations. These 100 devotions encourage awe at God's creativity with an in-depth look at

- Space, Galaxies, Planets, and Stars
- Earth, Geology, Oceans, and Weather
- Animals—from Hummingbirds to Dinosaurs
- Our Minds, Bodies, and Imaginations

Each devotion features a “Be Amazed” section with fascinating facts, hands-on activities, and a closing prayer. Based on Louie Giglio's popular messages “Indescribable” and “How Great Is Our God,” *Indescribable: 100 Devotions About God & Science* will help kids discover the incredible creation of our indescribable God.

From Reader Review Indescribable: 100 Devotions for Kids About God and Science for online ebook

Cassandra says

I received a complimentary copy.

Review- I think this book would be great for religious homeschool families that have younger children. While any age can learn with this faith as well as science based book, this is geared for younger readers. With easy to read and learn font as well as illustrations this book will catch your readers interest.

Tirzah says

I am glad I discovered this book. It is an appropriate, kid-friendly devotional that does a great job tying in Scripture with science. I originally read it to see if it was something my space loving nephew could learn from and I ended up learning and re-learning some stuff as an adult! I highly recommend to all parents to give to their young children. It is a wonderful resource and alternative to a lot of the secular science books out there. I already read a few pages to my nephew and plan on sharing more with him. I also purchased a copy as a going away gift for a family with 3 science loving kids.

Vera Godley says

What a grand opportunity to lead your child to discover the indescribable wonders of the universe made by our wonderful Creator. And this new devotional book for kids will enable families together to embark on this wonderful journey of discovery.

Every day's devotional is packed with wonderful scientific information and a brief scriptural reference that ties it together. The doors for discussion will swing wide open when families use this book for family devotions

But it is not only a book that can be used in a family setting. Kids themselves will wonder at the awesome God that created our world as they read through these 100 devotions on their own. An opportunity to establish a habit of daily time with God.

Seriously, my husband and I (we're grandparents and great-grandparents) have enjoyed reading some of these devotionals together and are quite frankly simply amazed at the material. It is so well presented and not too "little-kiddie-themed."

I highly recommend this little book and know it will be a treasured addition to a child's or family's library.

DISCLOSURE: I received a complimentary copy from the BookLook Review program on behalf of Thomas Nelson Publishers and the author to facilitate a review. Opinions are my own and freely given.

Based on Louie Giglio's popular messages "Indescribable" and "How Great Is Our God," Indescribable: 100 Devotions About God & Science will help kids discover the incredible creation of our indescribable God.

I really like how this bring faith and science together. Our children are very much into science, and asking 'why?' about everything, and this book tries to answer that question. It also teaches some basic science in the process. The devotions are like mini-lessons, with facts about the topic du jour (only 100; not 365) and related Bible verses. Perfect for younger children, but also for kids who might have reached that age where they're having a hard time just accepting God and are looking for deeper..."proof" is not the word I want, but if you have teens, you'll know what I mean.

Zoe Schoppa says

Indescribable: 100 Devotions about God & Science is a wonderful homeschool resource. It is not so much a devotional as it is a book that shares some interesting tidbits of science and then relates how God's indescribable imagination, creativity, and scripture relate to the science. This book is the very first thing that my kids ask for as we begin a school day. They look forward to it. They are excited about it!

Breakdown

Each lesson begins with a scripture verse. Giglio seems to primarily use the International Children's Bible (ICB). There are also lessons from the New International Version (NIV). I'm not happy with the use of the ICB. I truly don't believe that a child needs a simplified version. It is our responsibility as parents to teach our children about God. it can lead to wonderful places when you discuss the meaning of words and concepts that you encounter in the Bible that a child doesn't understand. A conversation about what Bible version is appropriate is hugely controversial, of this I am aware. This is a review, so I'm sharing my thoughts. My children and I have chosen to look up the scripture in our personal bibles, which happen to be the English Standard Version (ESV). The kids rotate who looks up the scripture of the day. This practice helps them to locate passages in their Bible and gives them an opportunity to read God's word out loud.

The content of the lesson reports an interesting science fact and ties it into a relationship with God. Either the relation of God's creation and imagination to the fact or how that fact can lead towards building a greater relationship with Christ,

The lesson ends with a very short one or two-sentence prayer relating to the material.

Last but not least... my kid's favorite part, Be Amazed. Here you will find fascinating science facts, calls to action, etc. Fun information.

I have found Indescribable: 100 Devotions about God & Science to be a jumping off point for some intimate conversations about God and a whole lot of trips to the Internet to google about the scientific facts involved. I recommend that you get a copy to enjoy with your kids. You definitely don't need to be a homeschool family to learn and have fun with this devotional.

Homeschool parents

This is only a portion of my review. I will be adding (or have added) many links to my review of Indescribable on my blog for supplemental study. You can find them [here](#).

Disclosure... I am not an advocate of all things Louie Giglio. He has some theological beliefs that I do not find expressed in scripture.

As a reviewer for FrontGate Media, I received a review copy of this book in exchange for my honest and unbiased review. My thanks to FrontGate Media, the author, and publisher.

Syncopated Mama says

What better way for children to discover the wonders of the universe than with The Creator!

This book is perfect for all those little minds full of curious thoughts about STEM-themed topics. What I love most about this book is how it's bursting with scientific findings, photography and original illustrations about all sorts of topics related to science.

Children are always fascinated with learning more about these things, so engagement with this devotional should be really high.

The introduction points out that four major topics are covered in this book: space, the Earth, animals, and people.

It also suggests that readers should feel free to jump around and focus on just one topic at a time if they'd like -- and even makes this easier by grouping readings by topic and page number.

It's great to see how Louie not only helps kids learn more about each subject, but then relates each one to the awe and wonder at God's creativity with them all.

Each devotion also includes a "Be Amazed" section that adds additional facts and hands-on activities to try and is followed by a short prayer to close everything out, as well.

I received a free copy of this product as a member of The Booklook Bloggers Program in exchange for writing a review. All opinions are my own.

Laura says

INDESCRIBABLE: 100 DEVOTIONS ABOUT GOD & SCIENCE is seriously the coolest devotional I've

seen yet for kids. I am a parent and I love it.

I discovered Louie Giglio several years back when I watched a DVD with the same title: INDESCRIBABLE. And I never forgot it. In fact, I bought it for our own personal library. Mr. Giglio loves God and loves science and he is a pastor of a church and wow. Any way, when I was offered the chance to review this book, yes, I jumped.

As mentioned above, the science topics range from space to earth, to animals to us, and it is all tied in with God and Scripture. My two daughters (both older than the targeted ages) are as in love with this as I am. And if you tied it in with the internet, looking up references, google images, and Wikipedia you can use this devotional as a faith-filled curriculum for science.

I would totally recommend this devotional for families, homeschoolers, Christian schools and more. Would make a great gift for your favorite elementary age child.

I was given a free copy. All opinions are my own.

Michelle Hernly says

Hands down, this was the best devotional we've ever done together.

Marie says

We received this from our church and I highly recommend it! Each devotion is centered on a Scripture and a scientific concept and includes a short prayer and a "be amazed" section. Highly enjoyable for parents and kids.

Kaitlin Garrison says

I absolutely adore this book! I'm an adult and I've gleaned so much information from this sweet little Book! Each day contains an awesome fact about science or nature and ties it in with the awesomeness and creativity of God. I HIGHLY recommend this book for kids AND adults!!

Jason A. says

Indescribable: 100 Devotions about God and Science by Louie Giglio is my new favorite devotional to read to my kids.

Giglio brings out the most amazing facts and scientific discoveries in our world that point back to Creator God and God's Word, the Bible. It teaches kids that God created science and that he uses it to say something about His character.

My kids love learning about the unique ideas presented and always ask to read one before bed every night.

As a parent, the devotional engages my mind and brings up natural conversation starters with the kids to further discuss the topics and the science presented.

I love it!

Melissa Vickers says

Can't wait for my kids to be older so we can read this together. Very creative and beautifully done!

Brooke says

I actually waited up until midnight on the site for this one! Louie Giglio always has a different perspective of God with nature and it's also how I see God best. I knew I needed this one! 100 adorable devotions for kids filled with a lesson, a verse and cool facts that help it sink in and see how incredible God really is. Talk about someone who has some serious creativity, you see first hand how God thought everything through when he created not only me and you but the entire universe!

Ann Singer-Clark says

This book is a must have for all children. It has fascinating daily tidbits of information about science and incorporates these facts into devotions with Biblical verses. The author does a great job illustrating how powerful our God is while still acknowledging the science behind creation. Any well educated Christian will love this book!

Amy Bradsher says

Indescribable is a new devotional for kids written by Louie Giglio, and I'm in love with it! This is an excellent resource for kids. Indescribable has 100 devotions focused on showcasing the amazing creativity of Creation from a scientific standpoint. It features cool science facts, photography, and super colorful drawings. Each devotion has scripture, a story, application, and neat stuff about science.

One of the things I love about this book is the way that Giglio points out the awesome creativity and attention to detail in our Creator - and the devotions are written in such a way that you'll be admiring these as you go throughout your day. After reading the science facts, you'll find yourself appreciating Creation all the more.

Another aspect of this book that I love is the way that the science facts support the amazingness of creation. Often people try to turn that around - to say that science tears apart the idea of faith - but that couldn't be less true. The intricateness of the natural world points to a Creator, just as the Bible says, and Indescribable points to that truth.

The devotions in this book are all in the following areas:

Space, galaxies, planets, and stars

Earth, geology, oceans, and weather

Animals

Our minds, bodies, and imaginations.

My Little Man is going to be SO EXCITED to read these "scientific devotions." It will give him the opportunity to combine several of his deep, long-time loves: God, science, and reading. I love the focus Giglio has put on these four areas, and that's also the only thing I think could be improved; in the book, these four areas are all mixed up. I would have liked to see all the space devotions in the same part of the book, for instance.

Beyond that picky thing, this book is fantastic. I can't wait for My Little Man to read it and to shout excitedly, "Mommy, you know what?" I love hearing him be excited to learn more about Jesus, and to learn more about the world that God created, and I know that Indescribable will do just that.

I received a free copy of this book. All opinions are my own.
