Moon Lovers #1: BBW Werewolf Shifter Romance Mac Flynn

Tasha Taylor was an average woman with an above-average waistline, but one night all that (except the waistline) changes when she's attacked in the laundry room. Her savior is a large shadow with glowing golden eyes, and her new enemies are a group of hanky-wearing thugs who want to go through her to get at her hero. Now she has to juggle assassination attempts, crooked cops, the attentions of her reclusive apartment manager, Greg Garrison, and a growing desire for cut meats.

Can she keep herself alive long enough to find out who saved her? What does the gang really want with her? Will she ever have time to use that Thigh Master?

Fran says

Guess I didn't read tje description careful enough.

I believed I was getting a complete story but that wasn't the case. This is just two peaks at the stories inside; kinda wetting the reader's curiosity. Concept was interesting but that's all.

Deanna says

Good news! No sex this time!

But I felt like this story had no plot, and no ending. It just kinda stopped

Nadine Tomlinson says

I enjoyed it.. When can I download the free books

Mimie says

Rate : 4.5*

What Tasha thought was her ordinary Friday night doing laundry doesn't last long, when a gang come busting the laundry room, looking for their loot. Caught hiding between the washer and dryer, and without a shirt, she wishes she was partying instead. Then, her guardian angel arrived, beating each of the gang. All Tasha can remember is eerie yellow glowing eyes.

Ah, I've never been so high on an author since Mortal Instruments. Funny, witty comeback and a character I can relate to (being a plump person myself). Nice one, Mac Flynn. Thumbs up!

Rosanna Leo says

I was immediately attracted by the insanely hot cover for this one. I was excited to start it: werewolves, lovers, mysterious circumstances, all the makings of a good romance. Ms. Flynn has a good sense of humor and I had a few giggles. However I felt her hero Garrison could have received a more "heroic" treatment. Now, this is a part 1 of a serial, so I have no idea how it ends. For all I know at this point, Garrison will turn into a raging, sexy Alpha man. In this book, he is less than that and that took away some of the appeal for me. The story had somewhat of a superhero quality to it (references to superheros, the Bandanna Bandits) and Garrison comes off as a Clark Kent-ish figure. However, based on the cover, I was looking for

something different. There's no sex or romantic overtones in this first part, so again, I don't know how the author will resolve it. I would read more by this author, but I think I'd prefer to read a book that isn't left on a cliffhanger.

Tiffany says

Kind of a blah story and way too short, It's like a preview of a full novel. I guess this is a serial but it doesn't make me feel like buying the next installment.

Kelly says

Only had a sample of this book seems alright after the attack seems vary slow going.

Toni says

First thoughts after reading this book were that it shouldn't have been so short. The book ended up with me having more questions that had no answers. I feel like if it were longer, and it didn't abruptly end, I would have been able to make a connection with our heroine and would want to read the next book(s) in the series. But right now I don't feel that. I mean, the writing was done well. The scenes were well described. The emotions were there. But I didn't get a handle on any of the main characters. I didn't feel that connection you get when you know you're undeniably drawn into the story and will commit your time into reading the rest of the series. If it would have been longer, and I had a little more time with the characters, I may have developed that all encompassing feeling but I didn't. Therefore this book is a 3.5 star book.

Jennifer Erwin says

Serial novella freebie that's meant to entice you to buy next chapter. But the characters fell flat and nothing encouraged me to continue on to part 2.

Sue Davis says

Good beginning...

Would love to reread this and all other parts together. In this short start I realised just how much fun this story would be. I started laughing so much as I read the story. The way the main characters go back and forth cracking funny remarks at each other makes you want to keep reading more of their story just to see where it will go. This writer seems like he knows how to get you interested in his books as this is the third I have checked out.

Jennifer Holzapfel says

Funny is the first word that comes to mind at the first volume of the Moon Lovers series. It seems a mild mannered, and quite small, apartment manager has a secret side that is not so mild mannered or small. I have yet to be disappointed by Mac Flynn's writing. This is about the 4th series I have started reading today. Flynn keeps impressing me, which is a great compliment, because I am nit picky and have so far only found 1 typo in any of the books I have read today. I find this impressive, when so many writers are just trying to make money, not caring if their books are sub-par.

BeachLove20 says

What?!?!? Way too many sheepish grins for such a short story it was annoying. The female character was stupid.... oh im fat but let me take off my shirt in a public laundry room to wash it hope no one sees me. That made nooooooooooooooo sense at all. I'll finish the series if the remaining books in the series are free.

Crystine Fujimoto says

Loved the humour, but I hate having to write a bad review.

I loved the humour, the premise and the plot. I just wish this wasn't a serial and it was a better value. This was the first book which was free, the following "books" were \$.99 each. So the entire 6 book series is just under \$5. That said, I read this first portion/book (which was listed as 44 pages) rather quickly. I thought that it was a fast read so I went back and counted the reading pages. 20 pages and 4 chapters and this was the longest section/book of this serial, the rest were listed as under 40 pages. You have to admit this is a very bad bargain. So I went looking for a box set to see if it were cheaper. \$4.99 for the boxed set, \$9.99 for the paperback. Well that was not a bargain either.

I probably wouldn't have been so mad about this if this, the first "book" ever mentioned actually seeing the werewolf except in the dark. Of course there are enough clues to figure out who it was, but who has a nightmare and sexual fantasies of a werewolf that come to nothing and you never see? I'm sure this all disclosed later in the series, but I won't be reading it. Even though I loved the plot so far, I consider this not worth my money to find out the rest. I hate to point out that there are 20 book anthologies out there for \$.99, why waste my \$.99 on a 20 page "book" that is only a part of a serial?

Jody Bradley says

Even though Moon Lovers #1 is very short I kinda like it written that way. It left it open and gave me things to think about for the next part of the story. I loved how the book started off which made me want to read more. Throughout this short book I found it to be sweet and funny!

Mya says

I just got a weird and creepy vibe from this book. I want to know more. It was not bad.
