Savor You

Emily Snow

Savor You Emily Snow

Includes a bonus chapter from Devoured from Lucas Wolfe's POV!

Kylie Wolfe and bassist Wyatt McCrae have been bad for each other for the last several years, but it's impossible for them to end their toxic push and pull. Not when their attraction is constantly fueled by lust and proximity—she's her older brother's Lucas's assistant and Wyatt is his best friend and band mate.

So when Your Toxic Sequel makes a move to record a new album in Nashville, Kylie decides to make the latest break with Wyatt official by getting the hell out of town. She'll spend a week in New Orleans. A week to immerse herself in the Mardi Gras scene. One week to not think about the last time she was in New Orleans, seven years ago with Wyatt. Seven days where she won't have to see Wyatt every day just to fall ridiculously in love with him all over again—where, if she wants to, she can have a normal, no-strings attached fling that won't end in heartbreak.

Too bad Wyatt ruins everything by showing up, as gorgeous and demanding and awful for her as ever.

Wyatt refuses to let Kylie give up on him. Not without reminding her why they both fell so far and hard in the first place. Not without making her savor the good memories and what could be their last chance with each other.

Christy says

If you have read Emily Snow's Devoured series, you have met Lucas Wolfe's little sister, Kylie, and his guitarist, Wyatt. I loved Kylie in Devoured. She is spunky and fun, with blue hair, tattoo's and piercings- but we see a whole different side of her in Savor You.

Wyatt McRae was Kylie Wolfe's first love. They have been doing the on again off again thing for the last 7 or 8 years- since Kylie has been 17. They have been through too much together. Their love is intense, real, yet they seem to be toxic for each other. Kylie can't do it anymore. She can't keep repeating the cycle. She has to call it quits for good this time.

We hurt each other. ?Then we mend ourselves.
And then, we do it all over again, only more violently.

She goes out of town to New Orleans with her best friend to clear her head. Wyatt follows her there. He can't believe Kylie is really giving up on them. He has made a ton of mistakes in the past, but he is willing to do whatever it takes to fix them. He doesn't want to be without Kylie.

'We're going to try again and we'll get it right.'

?Wyatt decides that taking a 'road trip' to places that are important to them will help his cause. Even though he doesn't say the words, he loves Kylie. He needs to prove to Kylie he is serious about them. What better to do than get a tattoo?

"You've always been amazing to me."

??It's a rocky road for these two, will they be able to salvage what is left of their relationship and be able to start over, or are some wounds just too deep...

Kylie is one kick ass heroine. I like her a lot- but there was just something about Wyatt McRae... I just loved this rockstar. He is a sexy man, domineering and sweet. He really is willing to do whatever it takes to get Kylie to be his for good. Yep... he made me swoon!

"You're mine. No matter what you decide or who the fuck you end up with, you always will be."

This was an enjoyable read for me, I actually liked it a bit better than 'Devoured'. The ending isn't a cliffhanger, but I am ready for book 2 to see what happens between Kylie and Wyatt!!!

Sammy ?? says

4 Stars

Savoy You is the first book in the spin off series for Devoured where we get up close and personal with Kylie Lucas's sister and Wyatt Lucas's best friend and band mate.

Wyatt and Kylie have an 8 year history of dysfunctional hook ups and in Savor You Kylie has finally come to a point in her life when she feel it's all or nothing for her and Wyatt so she takes a much needed vacation to start the healing process of getting him out of her system, this is until he turns up to try and make things right between them and to remind her why she fell for him in the first place.

Wyatt and Kylie had really great chemistry and you can see how much they love each other but find it so hard to show it.

The book does end on sort of a HFN so I really hope book 2 in this series is a continuation of their love story.

Zizz says

Almost 4 stars.

I don't appreciate the fact that Emily Snow's scheduled release dates are never in sync with when the books actually finally go live.

But I do enjoy her books and Savor You was no exception. Her writing is well-paced. The stories and characters (rock stars!) are interesting. And the dialogue flows.

Following her first series, I take it that she has a certain style. She starts out in the middle of the story. The back story is written later on via a novella. That's what happened with Devoured. I'm assuming this will happen for the Savor Us series as well.

Kylie and Wyatt have a lot of history. Kylie is giving up. This is their last hurrah before she walks away from this dysfunctional relationship/non-relationship that has caused her so much heartache over the years. 18 times to be precise.

The problem with starting out in the middle of the story is we don't get to experience the whole journey with them until later on. It is alluded to a lot in the first book but the details are vague. Too bad because it sounds like the history is riddled with so much angst. It sounds like it was a roller-coaster ride that should have taken the reader through emotional ups and downs. Somehow, the lack of details on their history prevents one from fully emotionally connecting to the story and the characters. **It rather leaves a lot feeling disjointed.**

The very same thing happened with the Devoured series. For the people who didn't enjoy the first book as much, they went on to say that things made more sense after the novella was released in December last year - months after Devoured was released.

I'm invested in Kylie and Wyatt's story though. Surprisingly, the steam factor is way toned down in Savor You relative to Devoured. But it does sound like their past is more powerful than that of Sienna and Lucas.

Elizabeth says

"No matter how hard we try, there's no place for me whatsoever in Wyatt's life. "

Anyone that has read the Devoured series has met the dynamic and spunky Lexi! Lexi is Lucas' little sister and band manager. She loves her brother fiercely, she loves rock and roll, and she loves Wyatt McCrae.

Wyatt McCrae is the epic damaged bass player. He has always loved Lexi and yet his rough and tough rock star lifestyle has always kept them apart.

While reading Devoured, we learned how desperate Lexi is to rid herself of everything Wyatt. She has escaped to New Orleans to try and get him out of her system. However, Wyatt has a completely different idea. Wyatt arrives in New Orleans to try and win Lexi back for good! Although Lexi knows it's bad news to let Wyatt back into her heart, she feels like this is the last time they can be together. As always, he sweeps her back into his arms again!

"I've been amazed by you since the first time I touched you, Ky. I've wanted every part of you since that day."

Wyatt and Lexi end up together on the road. He wants to remind her why they can make things work. The passion between these two is intense and beautiful. It is obvious that Wyatt has caused Lexi a great deal of pain and she is struggling to move past the hurt. Can she truly trust him again?

"I can't promise you anything, but I know how I feel about you." I know that I'll hate it if he's with anyone else. I know that if I walk away from him without trying, I'll spend the rest of my life hating myself, regretting what could have been.

There are so many beautiful moments on the road. Wyatt's drive to protect Lexi only makes you love him more. They are obviously so perfect for each other. If only they could move past the hurt and try to start over.

But Wyatt isn't done making mistakes. He lies to Lexi and it drives her away for good this time! I have to admit the reason might seem inconsequential to some. However, I can see why Lexi felt the need to run away.

"We can fix this, Ky," he says. I shake my head again, wiping tears from my cheeks. "We've been doing this for so long," I whisper. "It's amazing we didn't already give up on each other years ago. Don't you see it? If we haven't fixed ourselves by now, how the hell do you think we ever can?"

It is Lexi's mom that reminds her to not turn her back on love.

“You don’t know anything until you try. No relationship is perfect, and there won’t ever be one that is. You just have to figure out how to fix yours.”

Overall, Savor You was just fantastic. I truly enjoyed every second of the read. I love a strong heroine and a damaged hero. I love it when the author doesn't waste time getting the story going. These two have been through so much and it was breathtaking watching things come together. So you may ask why the four star rating? The ending, although sweet, left much to be desired. After all of the heartbreak, tears, years of brokenness, I felt these two deserved more than a few pages to complete their story. At first, I thought the next book would be a continuation of their story, but alas, it will focus on another broken band member. I would not hesitate to recommend this book to anyone who loves a well written love story. However, be forewarned the ending is left up to the reader. As for me, I imagine a beautiful future for these two.

“Without love, I won’t survive.”

Emily Snow says

Happy Independence Day, guys!!! To celebrate the Fourth of July, I've dropped the price of Savor You to 99 cents until tomorrow. (The links for Amazon, B&N and Smashwords are all below). Also, if you haven't read my book Tidal, it is currently on sale for \$2.99 on Amazon and Google Play!

I hope everyone has an AMAZING 4th! <3

KAT ? Kitty Kats Crazy About Books ? says

5 Huge "Your Toxic Sequel" Stars from me!!

I loved this book, you actually get a true connection with the characters (Wyatt and Kylie) I LOVED reading their story..

BUT don't let me get started on Wyatt!! OMFG you would want to hand cuff him to your bed and not let him go!! Scorching hot!!

"Wants" the next book!! NOW!!

~ Becs ~ says

Wyatt and Kylie have, over the years, been the best and the worst thing to ever happen to each other. Their relationship appears to follow a vicious cycle whereby they enjoy intense happiness together only to hurt one another, each time a little worse than the last and, as we join them, Kylie is about to give up on all that pain and walk away from Wyatt for good but he's not about to give up on her so easily.

I really liked Wyatt – he's an easy-going, charming, tattooed and pierced badboy rocker and he is totally focussed on Kylie. He's not prepared to let her walk away from him without a fight and is intent on showing her just why she fell for him so hard in the first place. Their scenes together were delicious and I really felt how much he loved her even though he struggled to find the words to tell her.

Kylie is a badass heroine – all spiky blue hair, piercings and blackbird tattoos. She's Wyatt's Bluebird and, even though she's deeply in love with him, something has happened that has made her decide that she just can't do this anymore. I really felt their pain and their sorrow and their reluctance to let go and was deeply rooting for them to smooth over all the cracks and find that happiness that has always seemed to elusive. I thought the writing style was very atmospheric and it was easy to lose myself in their sexy world.

It all starts right in the middle of the story and I confess I had absolutely no idea what was going on for most of the novel. I've never read the Devoured series which runs concurrently with this story and I think I would have understood this better had I read that one so I will say that this doesn't really work as a standalone novel. Something bad has happened between Kylie & Wyatt at Thanksgiving to prompt her decision to walk away from him for good but I never worked out what that actually was. I got the feeling that I'd jumped right into the middle of a story and had missed a big chunk of the beginning. The series is set to continue so I assume more will be revealed in the second book.

Despite all this, I really did enjoy the writing style and the evocative way that Emily Snow created her scenes and characters and I think I would have enjoyed this much more if I'd read the Devoured Series. I still got really engrossed, still enjoyed the tempestuous relationship between the two central characters and found myself curious about the biggest picture, about Lucas and the rest of the band. So, I think the failing was mostly mine.

3.5 stars

Snow says

God, I just hate when I stumble across a rock 'n' roll book that leaves me blank, disappointed...
Shit!

I just didn't understand this relationship, you might call me any name in the book, but I don't think that two

people who are "on and off" - when they are together they f*ck each other's brains out then they leave each other when the next hardship comes a long and to consider the fact that this kind of shit has been going on for seven years...they've been cheating each other too, well like that's something new, right? and they are supposed to be each other's love of their lives...

well, f*ck it , but I don't get it...

so, blame it on me, then, for not being trendy but this story still gets and "F"

Geri Reads says

4.5 savory stars!

I ended up liking this one a lot better than Devoured simply because I love, love Kylie. Her push-and-pull relationship with Wyatt was angsty and hot. I connected more with their love story, maybe because they had a long history.

Her history with Wyatt was definitely complicated and full of heartache. They were both in love with each other but are too stubborn to either just let go or work at their relationship. They were the very definition of toxic.

Wyatt really surprised me here. While I would have loved to be in his head, I still fell in love with him. I kinda have a soft heart for fucked-up heroes who finally realizes his lady love's worth. While Sienna and Lucas have a somewhat dominant/submissive relationship, Wyatt and Kylie are both equals in so many ways. It does cause a lot of heartache between them but their coming together made all that angst worthwhile.

Savor You is a separate series from Devoured but definitely connected. This book would be enjoyed best if read right after All Over You and Devoured. :)

Michelle Valentine says

I loooooove this book! Wyatt McCrae is my new book boyfriend. Love it!

Joanne says

4.5 - missing a half because I feel like I was left with unanswered questions. But I loved the characters and the story line :)

Sofia Lazaridou says

It was a little slow for me. Ky and Wyatt have 8 years of history but we never get to know something more then what the prologue says, the fact that Ky lost her virginity to him, they were never exclusive and the

blackbirds Ky (Ky's tattoos, you can see them on the cover) are related to their relationship. There is some talk about a Brenna but nothing is being revealed until the end of the book. Why Wyatt waited so long to go after Ky? AND why couldn't he keep his *ick in his pants? I am more interesting in Heidi and Cal's story than Ky and Wyatt. Wyatt has to do something more to prove me that he deserves Kylie.

Jade says

A toxic relationship that spans 7-8 years, full of nothing but lies and cheating. The "hero" can't even say that he loves the heroine until he realizes after 8 years she's finally done; mind you he just got caught in a major lie about cheating on her. This was just a horrible book about a weak woman not understanding her worth and subjecting herself to, what I'm assuming, a lifetime of adultery and lies.

After 8 years he can only say I love you so that he can win the argument and keep her in that sick and twisted co-dependent relationship. And when the heroine finally leaves him and I get excited and think "yes backbone is surfacing!!!" she listens to some sob messages he leaves on her phone, drives to his house and they makeup. All while his daughter from a one night stand he cheated on her with is there. I really wanted to like this book but fuck man, this was more of a cautionary tale on how not to be a fucking idiot and waste your life on toxic people.

The whole thing that I don't understand is how she just takes him back after he point blank lies to her about cheating. They rush off and get tattoos to symbolize their new try at the relationship and then the next morning she has evidence that he lied confronts him. He then puts the blame on her saying that he couldn't tell her because when she said the "skank's" name it looked like she wanted to punch someone. This is pure manipulation and a form of abuse; the whole idea that the wronged one did something to cause the lie, hit, adultery, etc. that the perpetrator was forced to do that and it wasn't their fault. All followed up with "I love you's" and promises of it never happening again, it's a vicious sick cycle that some people can never leave. To me this isn't romance this is something dark and unhealthy.

Jeanine says

Well there is 99c I'll never see again.

This review is difficult for me, because my brother went through something similar for 4 years while in varsity and it was horrible and heartbreaking to see.

The 'relationship' between the H/h can never have a HEA. They have been screwing on and off for the last 8 years. The h gave the H her virginity at 17, but since then their 'relationship' seems to go something like this: have sex, fight, 'split', he has sex with groupies, she hates him, they have sex, fight, 'split', he impregnates another woman, she hates him, they have sex...

It was kind of funny because I kept hearing Ross' voice saying "We were on a break!".

I could not see that they had anything but sex going for them. The H even tries to save their 'relationship', and whilst doing so lies to the h's face. Great way to show you want to have a future with someone.

After 8 years it's painfully obvious they should throw in the towel. If for 8 years you have hurt and betrayed the person you 'love', then your love is not enough. There is no reason why history will not repeat itself and

the self-destructive vicious cycle will continue.

So this book was not romantic - it was sad and and showed people who will eventually destroy each other. As I already said there is no HEA and in these circumstances there never will be.

Sharon ∞🐉 is an emotional book junkie 🐉∞ says

4-4.5 ★'s

Kylie is the sister of Lucas, lead singer from Your Toxic Sequel and the main character in the Devoured series and Wyatt is the band's bassist. Wyatt and Kylie, Kylie and Wyatt...what's really been going on with them and are they in a relationship or not?

Sooo, somehow I completely flaked over this book. I missed that it had come out and for some reason I didn't realize it was connected to the Devoured series. Thankfully, *the extremely wonderful Jxxx ♥*, alerted me to it and I'm sooo happy she did because it was great!

I don't know why I was a little apprehensive about Kylie...I've always liked her feistiness. I guess I just wasn't that jazzed about her love story. Needless to say, I'm glad I read it anyway. I loved her!! It was amazing to see her softness and how vulnerable she can be!

I really liked getting to know Wyatt better too. Although to be frank, we don't really get to know a lot about him till the end. I'm hoping that will be rectified in the next book.

And that's kind of the problem I had with the book, is that we don't really know what happened between Kylie and Wyatt. They had gotten together eight years ago and been on and off since. It's not hard to figure out what some of the problems could be but you don't really get any particulars till late in the book and then, not a whole heck of a lot!

But pheww...are they hot together. I love how ES writes her steamy scenes and she certainly didn't let us down with these two.

What was near and dear to my heart though, was the romance. Every time Wyatt called Kylie "beautiful" my heart melted a little bit.

Of course, there's drama! Their relationship has hit the make or break stage and they both don't want it to end. Wyatt's trying but there are certain things that Kylie needs from him. (I just loved what she heard on the answering machine!) And I loved the tattoos!

We also get to know Heidi, Kylie's best friend, and Cal, another YTS band member, better. There's all kinds of hints about whether or not *something* is going on with them. I would love to get a book about them too!

And I'm happy to see there's plenty of Lucas with a bit of Sienna thrown in. This book runs along the same time line as *Devoured* so we get a bit of what Lucas and Sienna were going through. I really love Lucas' and Kylie's relationship and it was great reading more about them.

This book ends on a good note but IMO it's unfinished. I had thought the next book, *Damaging Me*, would be the rest of their story but that seems to be Sinjin's. Hopefully, we'll get some of it as a background story or maybe there's another in the future??

Favorite quotes:

♥ "I'm not one of your groupies."

"Far from it, Ky." A smile crawls across his face. "I'd never tell them that staying away has been fucking hell. I'd never tell them I'm not leaving, no matter how much they order me to."

♥ "How many of those things do you have now?" he asks, a serious expression on his face.

"What things?"

"Those goddamn blackbirds."

"Eighteen."

♥ "It's for you. You're my happiness, and I'll fight until the end to make sure you know that."
