Matthew says

Excellent series of books.... I can't wait until next book.

Manjari says

Reviews I have written are on the individual book pages, but all three of these were 5-star reads, for me.
Leviathan Wakes
Caliban's War
Abaddon's Gate

Sabine ClairCclair says

Great book!

John Mercurio says

I received the boxed set as a result of winning a Goodreads giveaway. I have not seen the television version of The Expanse, based on these books. I found this three-book set to be very engaging. The characters are well developed and have depth to them, and they make you want to know more. Each book has peripheral characters specific to one book, and even they are intriguing enough to make the reader want to keep reading. Once I started reading these books, they were difficult to put down, even when I had work to do (I am a teacher with LOTS to grade and prep)! I reached the point where I was even sad when certain characters died (no spoilers). I highly recommend these books. They are easy reads, although there is a lot in them so it will take time to get through. I spent a couple of weeks on each book, but it was well worth it.

Richard says

I thoroughly enjoyed these three books which I received in a Goodreads giveaway. Fast-paced, engaging, and full of twists and turns. I can easily see why they would adapt it for television. These guys are good. I want to go out and buy the next book!

Donald says

The Expanse Boxed Set is comprised of the first three novels in The Expanse series of books by James S.A. Corey (pen name of authors Daniel Abraham and Ty Franck). It is set in a future where humanity has

colonized the solar system and features chapters focused on different main characters - the primary character being a man named James Holden, whose actions help to create the conflict in this tale.

The best part of the story for me was the setting itself. Without going into spoilers, I would have been satisfied if these three books had consisted of a conflict internal to the solar system without any outside influence. I found myself fascinated with how the human civilizations depicted in Leviathan Wakes, Caliban's War, and Abaddon's Gate worked together and really want to see Earth, Mars, and the Belt become more fully fleshed out. If you enjoy world building, you'll love these books. Abraham and Franck excel at it.

The characters in the book are, for the most part, entertaining and I found myself feeling for all of them. Having said that, a certain character in Caliban's War caused the story to drag for me. I sympathized with him, but I also found myself trying to rush through his chapters in order to get to the other main characters.

My only other minor complaint - and the reason why this boxed set gets 4 instead of 5 stars - is a spoiler. When I began reading Abaddon's Gate I began to dislike the feeling of the Stargate universe intruding into the book. Perhaps it's just my love for the civilization presented in The Expanse so far, but the notion of having gates to the larger galaxy lessened some of my love for Abaddon's Gate. There's so much story to tell in our system that I just want to continue reading about it.

In conclusion, if you love medium-hard sci-fi (something more "hard" than Star Trek novels), then definitely get this boxed set. You won't be disappointed.
