Greenhouse Gardener's Companion, Revised: Growing Food Flowers in Your Greenhouse or Sunspace Shane Smith , Marjorie C. Leggitt (Illustrator) , Marjorie Leggitt (Illustrations)

The most comprehensive book on greenhouse gardening available today. Today, greenhouses and sunrooms are real living spaces where gardeners spend as much time with a book and a cup of coffee as they do with a watering can and a pair of pruning shears. In this fully revised edition of a best-selling classic, veteran gardener Shane Smith embraces this new "lifestyle" approach to greenhouse gardening. Through lively writing that balances wit with commonsense advice, Smith draws on his more than 20 years' experience to cover everything you need to know to establish a charming and productive greenhouse. "Exceptionally comprehensive . . . a joy to read."—Hobby Greenhouse Association

Was looking more for more tips

Elena says

Get this book if you have a greenhouse and save yourself a lot of trial and error learning! Great info.

Joseph Gendron says

This is an excellent and thorough source book for everything one could possibly need or want to know about greenhouse gardening. The most appreciated food in our house is that which we can harvest on-site and this book has helped me with what I need to know. I learned a tremendous amount and now have a treasured reference book.
