Nonverbal Communication in Human Interaction Mark L. Knapp , Judith A. Hall

This introductory text is designed for courses in nonverbal communication. Using the cross-disciplinary approaches of speech and social psychology, Knapp and Hall center on how nonverbal communication research affects a wide variety of academic interests. It is the most comprehensive, most readable compendium of research and theory on nonverbal communication available. It is the standard reference in this area.

John Sorensen says

I read this for the class that Dr. Knapp taught. Fascinating. It is a true textbook and not for the popular self-help audience. The book looks at research and does not go into nonverbal “gimmicks” that many popular books claim to be able to show you what other people are thinking. Book Index.

Armine says

i think that it would behelpful for me to read this book

Giovanni Calabro says

I read this book in college. I thought the topic was fascinating and still wonder today, if someone sitting in the center of an oval meeting table is more concerned with the feelings of the group than people seated at the ends. :)
