The Risk of Being Tamed Series

The Great Art of Life is Sensation

For the first time in her life, headstrong Ashton Rhodes was not in control. She had all but given up on being properly dominated. Her independent attitude left most men feeling they had taken on more than they could handle.

Hendrix Larson however, showed no sign of intimidation when he thrust himself into her life. Dismissing her apprehension, Ashton allowed herself to be lead into a world of absinthe and secret clubs where anything was possible.

She was finally submitting to the unknown and was certain of nothing more than one simple fact; Hendrix Larson was not to be disobeyed.

Deborah says

This is not my typical genre, but I kept hearing good things about this book, so I jumped in. I didn't stop until I had read the last page. I have read reviews, elsewhere, that say this book is better than Fifty Shades. I would have to agree. This book actually has a plot. This is a new author, and I can't wait for the next installment!

Kitten says

I was interested enough in the story line at first, but quickly discovered there was a lot of filler in this.

Also, giant chunks of paragraphs without any spacing in between, which became difficult to read after a while.

I skimmed through almost all of it except the scenes between Ashton and Hendrix.

Michelle says

This was a good read... But it had a lot of filling... Things that didn't really need to be in there to make the story.
