Seduced by the Wolf Terry Spear

His first priority is to protect his pack

Werewolf pack leader Leidolf Wildhaven has just taken over a demoralized pack. With rogue wolves on the loose causing havoc and the authorities from the zoo suddenly zeroing in on the local wolf population, the last thing he needs in his territory is a do-gooder female, no matter how beautiful and enticing she is...

She'll do anything to help wolves

Biologist Cassie Roux has dedicated her life to protecting wolves in the wild. On a desperate mission to help a she-wolf with newborn pups, the last thing Cassie needs right now is a nosy and entirely too attractive werewolf pack leader trying to track her down...

With rogue wolves and hunters threatening at every turn, Cassie and Leidolf may find their attraction the most dangerous force of all.

Mason Canyon says

Ever have one of those days when bad luck seems to follow you around?

Well, that seems to be the case for Oregon rancher Leidolf Wildhaven in author Terry Spear's latest release, *SEDUCED BY A WOLF*. Leidolf is terrible at managing the finances of his ranch and he had his hands full with several abused youths he's taken in. The fact that he has also just taken over as Alpha leader of the wayward pack of lupus garou (werewolf) just adds to his problems.

The wolf biologist Cassie Roux shows up to lecture on wolves. Leidolf is instantly attracted to her, which makes no sense. He's never been drawn to a human female before.

Cassie has her own agenda. She is fearlessly protective of wolves. She is able to study them in ways no other wolf biologist can. Having lost her family at a young age, Cassie was raised by wolves and being a lupus garou, she git right in.

When Leidolf and Cassie meet for the first time, she is wearing a cover scent so he doesn't know she's a lupus garou. But she knows he is and vows to stay clear of him. Leidolf learns Cassie has spotted a red wolf in the nearby Mount Hood National Forest. He's determined to find out more, afraid it could be one of his rogue pack members disobeying his orders again.

The search for the red wolf leads both Cassie and Leidolf into harrowing encounters with hunters and authorities from the local zoo intent on capturing wolves. Along the way, Leidolf learns of Cassie's true nature making him more determined to know her.

As Cassie and Leidolf fight for the survival of their species and the wolf, they battle their feelings for one another.

Author Terry Spear has done a wonderful job of blending light paranormal, romance, suspense, and mystery into a tantalizing story that will capture your heart. There is bits of humor and mischief woven into the right places of this story of dedication, honor and loyalty. The author makes the world of lupus garou come to life.

This is the fifth book in Terry Spear's werewolf series, but it is a stand alone book. Readers meet characters from previous books - including Leidolf - but aren't left in the dark if they haven't read the prior books yet.

For an enjoyable read and the opportunity to let your imagination run wild, pick up *SEDUCED BY A WOLF* and escape to Leidolf and Cassie's world where love does rule.

Leidolf Wildhaven is the leader of a new pack that was abused by it's former Alpha. Between protecting the pack and running his ranch he doesn't have time for much else. But when Cassie Roux, a biologist that specializes in wolves comes to town he's absolutely captivated by her.

Terry Spear has given us another great werewolf story. I jumped into the middle of this series earlier this year when I read *Legend of the White Wolf*. I fell in love with the characters almost right away. Leidolf

Wildhaven was introduced in that book as a secondary character, at least as far as I know that was his first appearance. Anyway even though he was a secondary character when he entered into the story he demanded your attention. I was really fascinated by him, so glad he got his own book.

Seduced by the Wolf is a fast, riveting novel of danger and romance. A fine addition to the series. Both Cassie & Leidolf in their own way are playing a game of seduction- that was quite fun to watch. Ms. Spear has creates unique werewolf stories that are hard to put down.

I enjoyed finally being able to read Leidolf's story. I think the pack dynamic is a bit different than any of the earlier books and that made it interesting. I also liked the strong female personality that we found in Cassie. I wish we'd gotten a bit more into the Aimee and Carver story line, but other than that I was satisfied with the story and the conclusions. I look forward to more from this series.

Boring, definitely a disappointment.

SPOILER. Disjointed. You know it's not gonna be good when the story is so tedious, you start skimming ahead in the book. I've only read 25% but I can't make myself read another page.

Started out great with fun premise...wolf researcher catches attention of local wolf pack leader. But then she's trying to get away from him because she doesn't want him to know her secret, but she just happens to run into him forrest, and then her long lost cousin is trying to track her, and a fellow wolf researcher is infatuated with her and is tracking her, and she's running away again from the alpha, and she's trying to rescue a female wolf, and there are some hunters, and maybe some rogue werewolves, and everyone is running all over the

damn forrest trying to find each other. If that felt like a tedious run on sentence, that was my experience trying to read Seduced By the Wolf. Time to move on to something else.

Katherine says

I just couldn't keep reading this book. There is a good story trying to get out here, an interesting world of wolf shifters and wolves. But the story kept tripping on itself, there was so much inner monologue in all the characters heads. It drove me mental.

This was a freebie from kobo.

This one was about Leidolf, who's been around in the last couple of books. For some reason, I expected him to be more alpha from the previous books. The zoo people are back and that bit turned out quite interesting. Overall, another OK read.

Marina says

Okay so I am reading totally out of order but this is my new fav author. Love this series. Cute and sexy. Fascinating world. I want to know more!

Pros: good research and decent premise

Cons: lots of tell, not enough show; poor world-building; poor characterization; ineffective writing style; not a good stand-alone; boring; unexciting sex scenes; unbelievable emotional connection between main characters

Continue below for extended explanation

This book could have been better - I think. I could see that the author made efforts to do research about red wolves. There was at least one particular scene when Cassie and Leidolf played that proved to be a nice example. However, good research does not necessarily yield good writing and good story.

This book is apparently the 5th book in a series. I didn't think that this would bother me so much, relying on

the optimistic hope that the author would neatly add in the details that would be necessary to understand the culture of the people and the world. While the author did attempt this through endless narration and info-dumping, by the end of the story, I was still left baffled and with unanswered questions about the culture, the world, and the time period. Therefore, as a stand-alone, I do not recommend.

I didn't care for the writing style. There was a great deal of telling rather than showing, which I objected to. For example, Leidolf is supposed to be the alpha in the pack. Perhaps I am too used to paranormal shapeshifting romances (*coughNaliniSinghcough*) where there is what may be an exaggerated sense of "alphaness", but I didn't think Leidolf exhibited much of an alpha in him. In fact, the teenage alpha, Evan, showed more alpha characteristics. Or maybe that was simply teenage rebellion. There was info-dumping. One particular line in which Cassie is defining an omega wolf to Leidolf had me snorting in disbelief. Seriously, wth? He's the alpha of the damn pack. Of course he would know what the omega of the pack. At any rate, I felt that this really slowed the pacing of the book. There was also too much going on, which did not fail to further confuse me. I also didn't understand why the whole Poseidon dreams were in there. It seemed silly and unnecessary. While the premise of the story was promising, I was actually pretty bored by the execution of it.

The world didn't make sense to me. What was the time period? When Cassie and Leidolf spoke about their past, it sounded like 19th century Western, but most of the time sounds like modern day US. I didn't quite understand what the difference between royals and non-royals were, and whether there was a hierarchy that was influenced by the "royal" status. I was confused about the "pack" hierarchy, and why the heck the pack wanted so much for Leidolf to stay. How did they determine who was alpha or beta? We were just told, oh such-and-such is alpha and such-and-such is beta. We weren't *shown* this. In short, I really couldn't get a good sense of what the world and the culture of the werewolves was like.

None of the characters really stood out at me, not even the damn hero. Cassie ran away a lot. Leidolf chased after her a lot. The others just stood around grinning. The big, bad wolves went around skulking. Was Cassie's colleague, Alex, really that necessary? Or the zookeepers? What was this whole tidbit about Bella-and-Devlyn-whoever-they-were? The romance wasn't entirely believable. I didn't really feel that there was much of an emotional connection between them. It seemed entirely physical. And the whole thing about Cassie wanting to help out the lone mother wolf with her pups because she wanted to be a mother just ticked me off for some reason.

I did not start off this book hating it. In fact, I had skimmed a glowing review prior to reading it so I'd had hopes - which were dashed within 2% of the book. Since I dislike leaving something uncompleted, I forced myself to finish it. I didn't realize until now how much it bothered me though.

Jacqueline says

This is a pretty solid entry in the werewolf genre. I like TS's werewolf world. This is the second or third one I've read and the world building is staying pretty consistent. A few things happen quicker than they really might in real life but it's pretty minimal. For example in this one near the end, Leidolf tells a man who works for the zoo that he's been having problems with cougar killing his cattle and a couple of hours later the zoo guy tells him he's captured her and her cubs. That just seems highly improbable and really wasn't necessary to carry the story forward. The whole book feels a bit condensed like that as if things don't take as long physically as they really would but it only occasionally bothers my enjoyment of the story.

The writing is well done and I liked both the hero and the heroine. I do think if you've read others in the series you'll enjoy this one better. I've got to go back and read the one or two I've missed. If you like straight forward werewolf stories without a lot of other supernatural beings cluttering things up, as I do, then you'll like this series.

Darcy says

Normally I find this authors books to be a solid good read, but this one was just lacking for me. I think part of that was the whole thing with Cassie and Leidolf, they weren't all that interesting. I found that the pack was much more fun and entertaining. They all seemed like quirky characters, that all of these people make up a pack of misfits. I am hoping the next book is better.

Terri says

I'm changing my bookshelf from "currently reading" back to "to-read" because I'm so confused by this story. I didn't realize it was number five in the series before I started it, so maybe that's the problem. I hope I just need to read the others first to make sense of this one. It might be good, once I can sort through just who all the different characters are and what motivates them. I'll try later. My head can't take it now.

Melindeeloo says

Seduced by the Wolf was the best of Spears' werewolves so far, but then again I was waiting for Leidolf to get his book (he's made short appearances in several of the others)

When wolf biologist Cassie Roux comes town to give a lecture, pack alpha Leidolf finds himself captivated by the enticing redhead. But since she's only human, she's not mate material. But Cassie's actually hiding a lot, and discovering that there are shifter's in town is going to make her job more difficult and her attraction to Leidolf is going to make her life even more so.

One thing I like about Spear's series in general, is that unlike some other shifter paranormals in which you could easily substitute 'vampire' or 'demon' for 'Lupus' without affecting the story, Spear's characters are not just called wolf shifters - there's bits of wolf behavior and pack dynamics woven into the characters and their relationships.

What I liked about Seduced by the Wolf in particular, that I liked the pull between Cassie and Leidolf and found it amusing that at the same time Leidolf is lamenting that Cassie's not a wolf so he can't keep her and Cassie is lamenting that Leidolf is a wolf so she can't just love him and leave him. And I really liked Leidolf later in the story when the deviously seductive alpha discovers Cassie's secret and tries to get Cassie to stay and I like how Cassie manages to avoid much of Leidolf's clever entrapment.

Ultimately, my only nit with the story was that as Leidof's mate, Cassie wasn't really willing to compromise to have the relationship with him - she just wanted the perks without giving up much to get them.
