Survival of a girl and her family during the Ice Age.

Maroo of the winter caves is about a girl who lives with her family of Eskimos and travels to new places every season. In this book maroo experiences new places and the love of her family. In this story maroo and her family run into obstacles and dodge snowstorms, wild animals, and hunger to get to the place of her dreams for spring.

I think I can connect to maroo the most because of her love for travel and to see new places. I can also connect to her desire for adventure and how she loves to be with her family. However I can also connect to her overall attitude to meeting new people.

I give this book 4 stars because I like how the author captured the non-fiction facts but added their own story to the mix. I recommend this book to anyone who likes a mix between fiction and non-fiction.

Honestly, teachers think our reading capability is so much smaller then it really is. I don't really remember this book, but I know there were parts that were pretty good. This isn't my type of story and I never would have chosen it on my own, but overall I don't think it was bad. But not incredibly good.

Okay, I personally disliked this book very much. The story was just dull, and lifeless. Pun intended (if you have read this book you'll get what I am saying). And the characters were flat out dumb. The only part that I like was when they found the dog (I am an animal fanatic). I absolutely hated this book so much. I don't understand how teachers can give us this unentertaining stuff. If I could rate this book at zero stars, I would in a heartbeat. I disliked this book so much, that when we had a test on it I didn't even bother to study, and I got a 66% on it (I kind of regret not studying now), but I still passed the class with a 85%, thanks a lot Maroo. I could have gotten a 4.0 GPA you dirty sock, but noooooo the teachers had to make us read this abomination so that I had gotten a 3.8 GPA, and my parents expect much more from me. Oooooohhhhhhhh, don't even get me started on the freaking signposts! The teachers made us do signposts on the stupid story. And just in case you are unfamiliar with signposts, they are when you have to look for certain things in the book (I'm not going to explain what they are), provide a valid explanation for it, and then cite in the book what page you found it on ex. (Turnbull 45) (Which I was partially okay with. Teachers expect so much from us these days! And we even had to answer questions on the story. So if you are forced to ever read this book, then may God have mercy on your soul, and if you are thinking of reading this book for pleasure, then just don't, and save yourself. Even if you buy this book to look smart in front of your friends, still don't waste you

money on this horrific creation. You know on how people have fears of different things, such as Arachnophobia (the fear of spiders). I must have Marooaphobia. I mean honestly, it just makes me so butt hurt simply just talking about this book. I may just be over exaggerating, and if you think that then go ahead and read the book, I won't stand in your way. I expect more from this author (Ann Turnbull). As you can see- wait hold up this isn't an essay. So finally after this whole rant can't you see... that I absolutely love this book. Nah, nah, nah, get the heck outa here. I hate this book more than freaking Donald Trump and nobody likes him but himself. No joke, 100% accurate. See ya, if you are reading this book, wouldn't want to be ya.

This is a great book for any kid who liked Little House on the Prairie. It tells the story of Maroo, a girl living at the end of the last Ice Age, who has to complete a dangerous journey to save her family.

My 6-year-old is fascinated with descriptions of how people lived before modern technology, and I love finding books with strong girl protagonists, so we were both happy with this selection as part of our homeschool unit on early humans.

Maroo of the Winter Caves is a good book that I really liked. It had a lot of detail, and I think you should read it. If you like books that are adventerous then you should read this book. I gave it a 4/5 star review because it wasn't the best book, but it was a really good book. All in all, I think you should read this book!

In my opinion Maroo of the Winter Caves wasn't very intresting compared to the many other books i have read. The reasons I think this to be so is because,its is called a adventure but there wasn't much action or adventure really. But there where some good parts that i have to admit did bring some action. An example of this is when Maroo had to fight the cave lion it was adventurous. Though what i didn't like and what i thought the author could easily change it was making the fight a little more longer,for it is part of the climax.So it is really a combination of good and bad.But all together I liked it but the author could make it more intresting.

I honestly didn't think this book was one of my favorites. The plot was way too predictable. One thing I did like about the book was how much conflict there was. I know this is going to sound like I am mean and nasty, but I enjoyed their hardships and their losses. Over all, I didn't really like this book AT ALL.

Chandler Corpus says

I think this was an exciting and suspenseful book. I loved each chapter. every chapter ended with an exiting part and ended which made me want to read more chapters. This book was basically about a girl named Maroo surviving with her family during the Ice Age. She faces many problems and every problem she faces gets bigger and bigger. I think this book is really enjoyable and that everyone should read it.

Reptilian says

This book was okay for a old time book.This book had lots of cliff hangers that were suspenseful!There was many loses tricks and turns to the plot.It was really annoying each time there was a cliff hanger.....This book really never had any good detail..the only thing that wanted me to keep reading was the cliff hangers...This book was overall great from the suspense and the thrill.

!Spoiler:There is snow :3!

This book is okay. The only reason i am reading it is for school but other people might like it.

Selena Recoder says

The book was great I was really sad that Maroo's dad Areg Sr. died and that she left her brother Otak to go and find the other half of the tribe and tell them that the tribe in the blizzard needs help on getting back to the sea for their summer vacation. In addition on their journey Maroo's mother Tikek had a baby and she named is Areg Jr. after her father when he died. Also on that journey Maroo and Otak come across and injured dog, they took it and renurised it back to health they named it Rivo.

In my opinion for the book Maroo of The Winter Caves is not the best book out of a lot of books that I have read. There really isn't that much action the most of the action that I have seen in the book was mostly the time when Maroo's dad died. Another action part of the book was when Maroo and the others were traveling and they got stuck in the snow storm. Another main point was when the snow storm hit them hard, the Grandma had to send Maroo and Otak to find where the camp is. When Maroo and Otak were together Otak had left with the doing after getting mad at Maroo for killing the rabbit with his spear. Thus was a problem for Maroo because she was alone because her dog went with Otak. Eventually Maroo had gotten to the camp about 5 pages later. This whole review about one part of the book that I talked about was so long and about thirty to fifty pages long just for the whole part of the book. Finally, the book is really slow and boring to me what I had explained was the most action part of the book and it really is a slow and boring book to me.

Dylan says

Ehh it was ok Mrs. Price needs to choose a better book or have Otak become a spirit and get revenge!
