Red Surf Tracy Sharp

Private Investigator Leah Ryan is on a much needed vacation. A week in Bass Bay, Maine. Nothing but sun, sand and relaxation. No missing people. No murder. No stress.

But an hour into her vacation, Leah almost swims into a dead girl. Shark bites on the victim indicate a horrific shark attack, but closer inspection of the remains suggest that sharks aren't the only predators in Bass Bay.

As the bodies of more young women wash up on the beach, Leah is about to find out that murder doesn't take a vacation.

Red Surf is the 4rth in the Leah Ryan thriller series, and mixes humor with nail biting suspense.

I listened to this book so I really felt that I was with the character which made it much more riveting and exciting. I loved the relationship between Leah and Jackson. It was a book that you really weren't sure who did the crime until the very end. I also learned a lot about sharks. Great writing! Now I want to go back and read book 1-3 in this series.

Good book

I enjoyed reading this book. The author made it difficult to figure out who the murderer was until the end. Lots of nuts and a lot of action.

Wow! The author created a tense and fast paced story which I could not put down! Likeable and realistic characters, a great scenario, and a plot development that nearly had me biting my nails. Add to that a good and fluent narration style and obviously thorough research in the behaviour of sharks, and you have one hell of a story!

This is the fourth book in a series about the two private investigators Leah and Jackson, and I am certain I will get the ones before and any after this one!!

Netusila som, ze toto je uz 4. diel v serii, ale vobec to neprekazalo.

Hlavná hrdinka, Leah, súkromná vyšetrovateľka, ide z NY na dovolenku k moru. No hneď prvý den v mori narazi na zralokmi ohlodanú mŕtvolu dievcata. No čo je hrozne, niekto ju zviazal a tak ju dal zralokom. Hneď pride jej partak na pomoc. A veru je čo vyšetrovať, lebo mŕtvol začína pribúdať.

Velmi sa mi páčil vzťah medzi Leah a jej kolegom. Jemne napätie, no napriek tomu sa správali ako brat a sestra. Takisto Leah má zaujímavú minulosť, jej malickú sestru uniesli z pred domu, Leah sa dostala na ulicu a okrem iného aj kradla auta. Predpokladám, že o tom bude viac v 1. knihe. Prekaracky medzi nimi boli srandovne, ale chcem hlavne vyzdvihnúť temu zralokov. POdľa komentov na GR naozaj pozivala fakty o ich živote, správaní, o tom, ako ich lovia ľudia, čo by sa stalo, ak by vyhynuli. Super, že mňa palec hore, lebo sa

casto stava, ze spisovatelia nieco pise a nemaju o tom ani sajnu.

Boli tam nejake pre mna neuveritelne veci, Leah sa niekedy spravala riadne lahkomyseľne a naivne. Ale inak dobra oddychovka.

This was a pretty good read, especially since I picked it up purely for the fact that it had to do with sharks and I haven't read the other books in the series yet. The writing and characterizations are fairly simple, but not what I would call juvenile, so it makes it an easy read. The shark behavior in this book is fairly portrayed, which honestly surprised me because I've read shark books by so called shark experts that are full of inaccuracies (or just plain silliness), so it was refreshing to see accurate portrayal, especially from someone not in the habit of writing shark books.

One thing that did bug me though was some of the automatic assumptions of guilt based on the "hobbies" of certain people our fearless PI's investigate. I'm not going to say specifics because they would probably spoil the mystery, but I will say there is a difference between profiling and stereotyping, and this was clearly stereotyping (likely based in ignorance).

Despite that, Red Surf was still a nice, easy read and I will likely end up reading the other books in the series.

At first it's typical... a private detective treats herself to a vacation & you just know she's going to be sucked into trouble – whether she joins the investigating team in an official or unofficial capacity.... The action and drama quickly unfold though as several men (some creepy) are interested in her and she just keeps finding bodies. A trouble magnet, like your typical mystery genre-PI, however a different take than many of the typical offerings of the genre.

I found most of the information/ speculation about sharks to be accurate as well and have to respect the various perspectives on them that are provided here.

It was a great story, good read. I would just recommend that the author or her editor learn some basic grammar such as the meaning of there vs their and they're. In a 200+ page novel, things are going to get missed but this was a recurring mistake. My only complaint – will totally read more of her work.

Never have liked swimming in the ocean so thank you for reminding me why. This was a great mystery, I couldn't figure who was the bad person til the very end. Wow, some ending. Keep writing about Leah and Jackson.
