A beautiful reference work to Military History - hundreds of photos and pictures bringing life to every period of history and every culture you could think of. A military museum in a book!

Derek Strosahl says

This book took me on an adventure through warfare of all periods in time, from the wooden club to nuclear submarines. It included detailed pictures of the weapons and battles throughout all of human history. It described everything about the weapons and the armaments of tanks, ships, and planes. I think Gareth Jones described these weapons perfectly and even described their place of origin. I would recommend this to people who like history and who are a bit older.
