I loved the first half of the book, I give it 5 stars, but the book goes downhill steadily to be a one star book by the end. I hated Luk and I wanted her to divorce him or kill him and be free, that's why the book went downhill for me when she started to fall in love with him.
It's more like 2.5 stars.

Atina says

I had never once in my life like to read vampire-based story but this one is just an exceptional. The story was just beyond amazing and I fall in love with the younger brother of the main character, Casper! No doubt. It's 5 stars worth.

Joreadsandbooks says

An obvious 5 out of 5 stars for me ? I'm freaking in love with this book. This is not just a typical vampire romance story. This is a new experience for me. I cried a lot. Because that's me. Lol. But seriously. This is one of the greatest vampire books I've ever read. Love it so sooooo much! ???

Jenan sayed says

A work of art I cannot put it down for a second or stop re-reading god i love this book

Vibhuti Gupta says

The main female protagonist in this Book is super relatable. You may think of this as a cliché vampire story but it is so much more than that. Things will turn out the total opposite of what you might have thought. But that what makes you read the complete book. If you are looking for a book featuring vampires but it should have less clichés then read it.

Spoiler: The climax is very unexpected but amazing at the same time. You will definitely love that.

Heroine is crying to much. Maybe latter.

I read this on Wattpad. I really enjoyed the story, although I wanted more character development, and the grammatical errors drive me a little nuts. But a great story, in and of itself.

Cambria C says

This may seem like a very childish and cliché book, but it's actually quite riveting. It has tons of unexpected characters and twists to the story. If you're into the world where everything is left to the imagination, then this book is for you.

Nikola Jaworska says

the start was amazing and soo funny but it lost pace toward the middle and end

Karen says

I read this book on Wattpad and really enjoyed it. The storyline is jam-packed with twists and turns, misdirections, deceit, some violence, chemistry and love. I read this book in two sittings because I had to know how it ends. Excellent paranormal/mystery/romance read to wile away the hours.

Muthia Kharisma says

Thank you vicky for making this happen, i really love ur story. You are such talented writer ever, i wish you can publish your book. Or even more, make this as tv series. You put your hard work just for us, and that's what makes me adore you. Good luck vicky !!
