A Fallen Fortune Jackie Williams

Fleeing the humiliation and pain of a cancelled society wedding, Elspeth resolves to leave everything behind while she restores an ancient but beautiful mill in the depths of rural France. The last thing she needs is an arrogant, but incredibly handsome neighbour upsetting her days.

Desperate to escape from the endless worry of an arranged marriage and hoping for nothing more than a friendly chat to someone who doesn't fawn over his title and money, Leo goes to welcome a new neighbour.

The perfect view of Elspeth's deliciously shapely rear, as she taps tiles into place on the ancient mill roof, is the last thing he expects to see.

A short romance to idle the few weeks before his impending doom is one thing, but falling madly and hopelessly in love hadn't been on his agenda. Having it whack him right between the eyes is an unexpected bolt out of the blue. His life will never be the same again.

Can Leo save his sanity, his inheritance and his fabulous Château in France while keeping his identity secret from the lovely woman he wants? And after discovering his deceit, can Elspeth live without the love of the charming French gardener who has stolen far more than her heart and soul?

This book is suitable for New Adult upwards due to adult content.

Chariss Walker says

A delightful feel-good romance set in England and France. The two main characters have great chemistry from the moment they meet, but will 'titles' and other envious parties get in the way of their happiness? You'll just have to read it to find out. Although I rarely read romance novels, I have to say this was "Most Enjoyable" and well written.

Christoph Fischer says

"A Fallen Fortune" by Jackie Williams is a lovely romantic story with great chemistry between the two main characters.

Set in rural France it describes the relationship between two neighbours who both have a past to deal with and who are also hiding other information from the other.

Charming, cheerful and well written this is a lovely little gem.

h kept her secret unnecessarily for dumb reasons.

I feel like the author worked really hard to make you feel the chemistry between the MCs but failed in that endeavour. It doesn't matter how many lines, paragraphs or pages you write about one character's super fast burgeoning feelings toward the other; if you can't write characters that readers can connect with, it's all in vain. I couldn't connect with either.

If it weren't for the mention of the internet, I would have been unable to pinpoint this story on a timeline: there are too many conflicting facts, attitudes, ideas and beliefs.

The story is also a very predictable one. Not the happy ending itself, which you kind of expect from every romance novel, but the actual plot. I knew how it would unravel when I was about 20% in.

I finished it because it was a shortish book. Otherwise I would have thrown it away.

Elspeth was running away to France after cancelling her luxurious English wedding two days before the event.

Swearing off all men, she purchases an old mill and begins renovating it herself. But just a few days into it, she meets her handsome French neighbor, Leo, and by the end of the week they are in love.

Normally, I cringe at the insta-love aspect of any book, but did I mention this book includes a Count, and a Baroness and even a castle! It's truly a fairy tale so love at first sight is expected. The Princess kisses her Prince and they live happily ever after, right?

Ms. William's created a perfect adult themed Disney story and I truly loved it. I would have given this book five stars easily, however there were a few grammatical errors as well as a whole page that repeated itself which was clearly an error. I believe this was in chapter 4. I had marked the exact duplication, however my phone accidentally deleted my review notes and I lost it. ?
