Dragonsoul Marc Secchia

Stricken. Dying. Laid low by the accursed Dragon Haters, Hualiamia must confront the greatest powers of the age as Dramagon's disciples encircle the ultimate prize—her. A girl born of fire, raised by Dragons and imbued with the terrible, corrupting power of ruzal.

Now, portents fill the sky. Legendary armies fly to war. The prophesied comet crashes into the Island-World, bearing the spirit of a malevolent Ancient Dragoness, Numistar Winterborn. She will obliterate any that seek to thwart her ambitions—all the armies of Men and Dragons, the monstrous war-machine of Shinzen, Warlord of the Giants, and most especially, Hualiamia and Grandion, the Tourmaline Dragon.

Epic powers collide in the worlds above and below the clouds. Can Hualiamia forge a path, a new way, as the first Shapeshifter Dragoness? Can her forbidden love for Grandion flower amidst the smoke and ruin of war?

Yet she dances over Islands, forging a fate inimical to all evil. For this she was born. First of her kind. Heart of flame. Shapeshifter Dragon. Dragonsoul.

Norma Reasor says

Not a trilogy

Well, this was a bit of a disappointment. I thought I was reading a trilogy, but it's not over yet. A series. This story bogged down a bit in places. It seemed as if storylines were drawn out to extend the length of the book instead of add to the depth of the story. I really don't like to read continuing stories and usually wait until a series is pretty much complete before I begin reading. I'm not very patient. It's been an interesting three books, so hopefully book four will be out soon. I hate all the loose ends.

Dragonsoul

Behold, the dazzling strings of gold,
Vivid enchantment from times of old,
Azure blue, the sky of infinity,
Soft cotton white eternity.

Wonders from long forgotten lore,
Hopes that was cut from the living ore,
Of existing life and burning fire,
We burn and burn and burn.

Still, we wake to every hour of strife,
The bitterest pain of every lost life,
And thus the grieving taste,
Paints oblivion to a kiss so chaste.

Yet hope came last to stay,
Inspiration, for all who wish to walk the way.
Oh, we reign from the eternal sky,
Free souls to soar up high.

In dreams we see the other side,
And hopes are borne across the great divide,
Upon silent wings through the night,
We greet the birth of dawn's faint light.

Awesome! I got to page 400 ish by December. Then I took a break and finished the last 70 or so pages two months later. Oh my God, I can't wait to read the rest! There was so much foreshadowing! Especially at the end with Hualiamia and the Queen of Immadia! I love Immadia! I guess she sensed Hualiamia was future

Queen Istaralia's sister (Aranya's mom) because of the enchantress thing. AWESOME! Another great book!

Love this series

I can not wait for the next one. All of these dragon books are wonderful. And this might be my favorite so far.

Fiona Andrew says

Oh mighty dragon

This series continues to amaze me. Lia has come through fire to become the Star Dragoness. A glorious white hatchling who promises to grow into an amazing Dragoness a fitting partner for Grandion. The descriptions of the world continue to astound with the Land Dragons, gargantuan Dragons who's descriptions allow you to imagine the size and complexity of them. Lia is still being attacked by her many enemies, and her adventures in this book are many and her solutions are highly imaginative. Love this series highly recommend. Off to read book four.

I guess competent editors are in short supply in Ethiopia, where Mr. Secchia works. I kept getting distracted from the story by the editing errors listed below.

Misspelled or misused: 1. reflect / reflecting ; 2. ponce / prance (best guess from context) ; 3. faraway / far away ; 4. palette / palate ; 5. elided / elicited ; 6. enormity / immensity ; 7. enormity / magnitude (please don't use ENORMITY in reference to size; it means enormous WICKEDNESS) ; 8. mucous / mucus; 9. attested / tested ; 10. decelerated / accelerated ; 11. Giant's / Giants' ; 12. dependant / dependent ; 13. overhead / overheard ; 14. of / on ; 15. tacked / tackled ; 16. fonts / founts ; 17. nearby / near ; 18. -come- / -cum- .

Added to text: to. Missing from text: out, a.

I was also confused by these two phrases: "A decidedly leopard young man" and, a little later, "ultra-leopard." The meaning is fairly obvious, from the context (extremely attractive), but, if this is some kind of African slang, my Internet dictionary is not aware of it.

Calvin Goodman says

I have up and down feelings about this book. This is the third book in Marc Secchia's Dragonfriend series, and I don't know if it's because of my mood not being very good when I read it, but the battle scenes felt jumpy and a little bit rushed. Coupled with the over abundance of enemies and perilous situations during those moments, this made for a sometimes head-spinning reading experience. Also, there were times when

the characters and places were a little bit underdeveloped. I will not spoil it, but I will say that Grandion's temper is very short fused in this novel.

That does not mean, however, that this is a bad tale overall. There are characters suffering from internal conflicts, most notably Hualiamas's dialogue between her human and dragon selves. And the scene where she calmed one character down from ending his life--I will not say names because that would be spoiling--was brilliantly done.

Overall, Dragonsoul was a good, if flawed, book. If you are a fan of the series, don't hesitate to pick it up, but don't go into it thinking that it's going to be close to the quality of book one.

David Rose says

Seriously? I thought this was it, the third and final book, everything wrapped up... but no. There's another coming, 'Dragonstar'. I think that'll be the last volume.

HOWever, in this book at least there's substantial progress on the main romance, hope that's unspoilerish enough, and in the meanwhile Marc Secchia just keeps on blowing this reader's mind with order-of-magnitude increases in the stakes (and the size of the dragons involved!). I mean, this is *epic*! There's an incredible amount of action and huge battle scenes in this book, all of it really well done. The mystery at the core of the series continues to unfold, and while certain key elements were revealed, there's quite a bit more to come. Which is why I'm going to have to get the next, hopefully last, book as soon as it comes out. At least Marc says he's working on it at top priority!

Bottom line, this is one of the dragon fantasy series I have enjoyed most.

Kathy Peregrino says

Wonderful series

I love the interaction between Lia and Grandion. Both characters are struggling to come to terms with their unusual situation in the midst of one struggle after another. Leaves you on the edge of your seat to see how they will save their world and accept their own feelings. Can't wait for book 4!

Boyana says

Great continuation!

Yet another action packed book, Dragonsoul advances the story of Hualiamas and her dragon to a whole new level. We see the main characters growing up and discovering their true identity. Still, the author left plenty of mysteries and adventures for the next book. Can't wait until 2017.

Ada Campbell says

Good book! Worth the read.

I don't generally spend money on books, but #1 was so good I paid for #2. Then #2 was so good I paid for #3. The story is starting to drag a bit, even though it is packed full of interesting characters. There is so much going on it seems like a soap opera, as soon as one problem is solved, another starts. This is not necessarily a bad thing, but the characters never get to really rest, or have some fun.

The only annoying parts of the book are that the characters jump to anger over tiny things (Lia punches a hole in the wall because someone said her boobs are big, then takes off in a tantrum?), and another part where Grandion tries to attack a soldier for a snide comment in a volatile situation that requires diplomacy (like he has no self control?) Then there is the whole "proverbial" thing, people don't say "they let the proverbial cat out of the bag," they just say "they let the cat out of the bag." Those little annoyances don't effect the epic story happening here, so I recommend these books to anyone who loves a good story, and loves dragons.

William Middleton says

Great book 3 of the series

Michael Wood says

Third Chapter of Dragon Life Epic is Fantastic S&S

Mark Secchia's third volume is a runaway hit, even better than the previous two books starring Lia, her numerous parents, her "frenemies" who oscillate from helpful to deadly, and, of course, her best friend (a miniature dragonet) and the object-of-her-affections: the Tourmaline dragon.

At this point in the story, Kia understands that she is somehow two beings sharing an existence: an orphan/adoptee of a human king and queen; a misplaced human child of a human queen; a dragon offspring of two of the most famous dragons on her world; a human child adopted for a number of years by the local king and queen dragons...etc., etc., etc.,

This extremely complicated story, with hundreds of characters, easily and immediately captured my imagination. All three volumes so far are very enjoyable reading.

HIGHLY RECOMMENDED AS BOTH AN INDIVIDUAL BOOK AND AS A SERIES!

Sandra L. Lubresky says

Excellent series! Anxiously awaiting next installment! The characters both human and dragon was very well done. A must read for anyone that has dreamt of flying with dragons!

Good sequel

Good read, a little too much battle stuff for my taste, but balanced well with personal stuff, too. I still am impressed with the length of your books. Too many keep them short, but you give a worthy read. Thank you.
