A Cancer Therapy: Results of Fifty Cases and the Cure of Advanced Cancer by Diet Therapy Max Gerson , Charlotte Gerson

Max Gerson's cancer therapy is one of the old school nature cure's, based on cleaning the body of toxin's whilst nourishing it fresh organic juices. Again the simple procedure applies that disease comes from an accumulation of inorganic toxic waste in weakened area's of the body, which cause an environment for disease to proliferate. There is now a support network in the UK for this treatment, but as with all naturopathic medicine it requires a lot of discipline and hard work to achieve results, just reading the book ain't gonna make you well! nevertheless it will give those who have been given up as dead a very good insight into the possibilities which can be achieved if the spirit is still strong and ready to fight. Personally I'd also recommend the work of Dr John R Christopher and Dr Richard Schulz who have taken Gerson's work to next level.

A Cancer Therapy: Results of Fifty Cases and the Cure of Advanced Cancer by Diet Therapy Details

Good Read

Difficult at times but fascinating

As a family we did not had deaths because of cancer, but I have a lot of friends, work buddies and other associates that have at least one family member that died from one form of cancer or other.

I wanted to know why people died from this disease and after reading this book by dr. Max Gerson all my questions and queries were answered and solved, everything got clear, the cause of the cancers all around the globe is our meat eating and processed eating habits, too much animal protein, too much animal fat, too much processed food, that's what is causing this cancer epidemic.

Anyone that has a family member a friend or knows someone that has a kind of cancer buy this book and all the books by Dr. Max Gerson and find your health back.

Very helpful.
Easy to follow and understand.

A good read

This is a nice addition to everyone's personal library.

Ann says

I read this book many many years ago and did not realize it was not in my list of reading. What this man did to try to educate society in the way the body can heal itself is astounding. And, the way our government tries to hide this truth is criminal. I watched a documentary about him yesterday and had never realized he died from arsenic. Very strange indeed. This book is his second attempt to publish this information, as the first manuscript was stolen after he completed the book- but prior to it going to press. He came to America around the time of WW II. His 86 year old daughter carries on his work today.
