Gwendolyn says

This is a dreadful book, quite terribly written. It's not even amusing trash.

Jenn says

Too many different characters. It was getting a bit confusing with all the names!

Tabitha says

The writing felt quite juvenile. I wanted to like it but it just felt like it was a chore to read by the end

Marti says

I had never heard of a homicide counselor. Somehow this book wasn't as good as I thought it would be. I certainly wouldn't want to live in a hometown like this one, with all the weird people at each other's throats. Tally is a strange nickname--neve really explained. She left here with her father at an early age, and perhaps shouldn't have returned at all. She keeps digging away as someone is wanting to kill her. I'll be interested to find out if the series continues, this being the second book.

Karen says

This was the first book I read by the author. While I enjoyed the plot and the interesting mix of characters I didn't find the heroine, Tally, to be believable in her role as investigator. I didn't find the leap from grief counselor to investigator plausible. I've since discovered there was a previous book in the series which may have made the jump more credible. That said, I still intend to read other books by Vicki Stiefel.

Alicia says

Eh, another thriller. Semi-enjoyable reading, but got a little Miss Marple in the end, with the killer explaining every detail of why they did whatever. Since there were no clues along the way, I suppose she had to do that. Still - annoying.
