My introduction to the UFO Baby has been through the anime version: courtesy Animax. I freaking love the series and I am still addicted to the series. I have been really wanting to read the manga, but unfortunately could not get my hands on it.

But recently I got to read the full series together, and totally loved it, the same way I loved the anime. But I just included the final volume in the list since I read all of them together.

This is the first manga I ever read. The story is SO GOOD and I really like the black and white picture format. The art work is great and Mika Kawamura is an excellent artist. I love all the characters and each and every one of them are important for the events in the story to take place. Though my favourite characters are Ruu, Wanya, Miyu and Kanata. It is an obvious answer. Whose isn't? Though I like and love Kanata the most. Not only is he handsome but equally a male romantic hero. The way he takes care of everyone and his quiet demeanor is exciting. I have been crushing on him since the Fifth standard. Highly recommended for everyone!

FIVE STARS!

This manga is great for kids out there and kids at heart. Cute storyline with an alien baby and an alien pet-babysitter.

I'd seen its anime version and I like it way more than this one but it doesn't change the fact that the manga is so cute and so lovely for kids and people like me-*kids at heart*. Miyu and Kanata and their friends were so silly, they made this manga so funny. Love it.

Only for kids and kids at heart
