I was guessing right up until the end!

I've had this book since I was 11 I think, and it's one of my favourite Nancy Drew stories. Cheesy, but in a comforting, familiar way, and very enjoyable. It's been a very long time since I read it last, probably my later teens. However I just read a novel that was so bad that I needed something simple and fun to make up for it, and this fit the bill perfectly, and I'm glad I picked it up again!

as soon as 'the flame' appeared I remembered this book! I read this when it was first published. the motives are a little hazy/simple but ok

Olivia says

This one is so stupid and the girls are so stupid in it. I mean why would Nancy ever let George try on such a valuable, historic dress when they are supposed to be guarding it? And they don't even have the owners permission.

Rebekah Tooley says

An interesting story for pre teens.

This is the one I borrowed from my bff in 5th grade so many times she gave it to me. It has two big fire scenes in it, which I thought was wonderfully harrowing. I don't remember much else about it, but I suppose the story or characters were especially well written. "White Water Terror" was another favorite of mine.

People have different habits. Playing with fire is one of them. I used to lit up leafs because it's really fun to see the smoke float up, but this is a different case. Once again Nancy tricked me into thinking there's only one crime. I love how calm she can be even in the face of the danger. Despite how I always act I'm brave, I don't think I could be like her.
