Z 2136 Sean Platt , David W. Wright

Several months after Jonah's death, Adam Lovecraft is once again following in his father's footsteps, this time as a contestant in the infamous Darwin Games. In The State's latest iteration of The Games, the odds of survival are slimmer than ever before, and Adam soon finds himself pairing up with an old friend of Jonah's.

Meanwhile Ana, Liam, and Katrina's escape from Hydrangea has not gone unnoticed, adding to their struggles to not only survive, but find Adam before it's too late. But when they pick up some unexpected new allies during a thwarted rescue attempt, they get more than they bargained for. Now that Ana knows she could be the key to stopping the zombie plague that has brought humanity to its knees, can she trust anyone?

Questions will be answered and fates will be determined in the thrilling final installment of Sean Platt and David Wright's series that began with *Z 2134*.

From Reader Review Z 2136 for online ebook

Christine Bishop says

A great ending!

Z 2136 is the final book in the Z 2134 series and it has an amazing ending! There is lots of fighting, betrayal, killing, bandits, and even some forgiveness. If you enjoyed the last two books in this series then you'll love the final book.

Rose says

Remember in Z2134 that the State was able to implant a chip in your head to make you believe what they wanted? I think Platt and Wright forgot that we readers don't have this chip and would never believe that bullshit ending. The rest of the story seemed the same as before but Keller? That just wasn't at all believable. I think they got tired of writing this story, realized there were too many story lines and the only way to tie it all up without writing another book was to change a character...drastically. Boo

Chris Page says

I enjoyed the series and it's good to reach an ending but the ending felt a little contrived as if the authors were glad to be able to end the series.

Karl Tybury says

This third series was a whole new world. By now, you know the characters like the people from your neighbourhood... You've witnessed their lives through the first two installments and you've watched them grow. Ana & Adam started off watching their father thrown into the Darwin, they've been through their own stories and now they're all grown up. Z 2136 isn't as heavy on the zombies as it's predecessors but focuses more on the other dangers in this post apocalypse... Mainly, the danger brought by humans.

Sophie says

Fell off a cliff, rather than ended.

Plaguedoctor says

I received Z 2136 in the goodreads giveaway.

I enjoyed this book pretty well. This books is like The Hunger Games meets Zombies. The plot line is

interesting although some parts of it could have been better. I liked most of the characters, I felt like some of them could have used some more development. I also liked the environment and the way it was described, it really give you a feel of the characters harsh living conditions. The writing style was also nice and descriptive, so this book would be good for readers who like more depth in books. I would recommend this book to people who like distopian game like books (Hunger games, Battle Royal, Maze Runner, etc) and zombies.

Victoria Marie says

The end just kind of felt a little off.

David Murray says

Well book #3 didn't disappoint. Give this series 2 thumbs up!

Blaine Moore says

I enjoyed the whole Z:2134 series. The final volume includes a LOT of carnage and mayhem, and many people are killed, but there's a satisfying end for some of the characters that gives hope for the future of the world even if nothing really changes by that point.

The origins of the zombie outbreak are explored, but only briefly; if the authors ever decide to revisit this world, they'll have plenty of room to set a story before the outbreak and detail the creation of and release of the zombie virus. (More details on that would give out some spoilers, even if it only plays a minor role in this series.)

Bianca Grabski says

3 & 1/2 stars

It took me ages to get through this, it didn't flow as well as previous books. And then the ending! It reminded me of writing an essay, and realising you're over the word limit before you've started your conclusion. Before the final chapter we heard every inconsequential detail for each character POV. Then, all of a sudden, it's over. No questions asked or answered.

Jarkko Laine says

This third and last book in the Z series took a while to get me immersed and interested again, but once it did, I couldn't put the book away.

The series as a whole isn't one of my favorite Collective Inkwell stories (if you're new to Platt and Wright, start from Yesterday's Gone or WhiteSpace instead) but it does have all the elements I like in Platt and

Wright's work: action, cliffhangers, characters who aren't black and white.

So, I'd say this is a solid book and a good ending for the series. Fans of Collective Inkwell and zombies will like the book.

Nahmita says

this series was amazing! i am sad that it is finished!!

Amber says

A zombie virus has ravaged the land and those who oppose the order of the state of the cities must be punished by being forced to compete in the Darwin games an extreme and deadly competition where innocent people compete against criminals and Zombies for survival in the barrens and the outback using whatever means necessary. After the events in Z 2134 and Z 2135 where Ana Lovecraft watches her father get murdered on national TV, she with her boyfriend Liam an ex city watch guard and Katrina a warrior rogue journey to City 6 to rescue her brother Adam who is forced to play in the games. Will they succeed while their enemies are secretly stalking them in the shadows? Read on and find out for yourself.

This was a pretty good post-apocalyptic zombie novel as well as my first ever novel I have read by Sean Platt and David Wright who are the hosts of the self-publishing podcast online. Having not read the other two books in this trilogy, I was able to familiarise myself with the storyline by reading the recap of the first two books that were included in this one. It was a very action-packed story with the chapters each focusing on a different character. It was originally made out as a serialised story for the Kindle too. I was so glad that I had chosen this book as one of the prizes at my local library's winter reading program. If you like action adventure post apocalyptic zombie novels, def check this book out. It is available on Amazon and wherever books are sold.

Billie Lawson says

This was the final book in the series and overall it was an enjoyable read. The ending was a little on the anti-climatic side for me, but all in all I am happy with the series. I loved that nobody was "safe" and the authors were very good about keeping you on your toes the whole time. The writing was good, not great, but then again this is a book about zombies so it is what it is. Overall 3 stars for the series.

Dale Rutter says

3.5 stars!

Overall, a good book and well written as always but the ending felt rushed. As I got towards the end of the book, I thought there must be a fourth book as there was no way they were wrapping everything up...but turns out they did. Apart from that, it was a good book, not the strongest of the trilogy (1st one was strongest, just) but still a good read.
