## **We the Three** C.H. MacLean

The world will be remade, and Haylwen is running blindly into the dragons' flames of destruction...

A magical princess in an amazing castle, Haylwen has finally found her true home. Having to wade through the social mud though, is driving her crazy. It's not the middle ages, after all. But old customs seem to die really slowly. The politics to confirm her father as king shoves her to the side, even pushing her to lie. Why should she have to hide all she's done, just because she's a girl?

As much as she wants to help her father, she can't sit around and do nothing. Faustas is chasing her, and no one is willing to rescue her giant friend Vora. Haylwen's had enough. She can't pretend to be a weak, meek little girl, not even for the dreamy Rivenwake. She is who she is.

However, with powerful magic users working against her, following her instincts may not be the smartest plan. And then there's the Dragons; pulling the strings, and unwilling to hide anymore. When the three clans burst out, the world will never be the same.

With a mysterious prophecy, magical secrets and a lot more dragons, We The Three is the third book following siblings Haylwen and Cadarn as they face their fears and come to discover they have powers they never dreamt of — and a destiny only they can fulfill.
