Frisca Saputra says

a funny way to take your little friends to the world of little animals!

Autumn says

Are you a Spider? Pretty much is a book about a spider. If you looked like one you would look like this, if your mother laid her eggs she would do this. We learn how if you were a spider what you would do and where you would hide when a predator came for you. At the end we learn that if you looked like a series of people which it shows girls and boys then you are not a spider but a human child. This is a cute little book, something that makes a kid thing about if they were a spider. This is a fun read that I think kids will enjoy. At the end there is a Did you Know section and it tells you a bit about spiders.

Brittany says

This is a great book for science and for teaching about spiders. It talks about how spiders build their web and use it to catch food and it also includes a lot of interesting facts about spiders. The great thing about this book is it is written in a language that is easy to understand and is pretty short in length but at the same time is very informational and kid-friendly.

Krista says

My daughter really liked this book. Simple but fun for little kids. Overall, just a fun read with good illustrations. We used this in our arthropods study but it really didn't have a lot of info. Mainly I just used this backyard book for a fun read that happens to go along with our study.

Definitely reading more in this series.

Dolly says

This is a fun book about spiders that explains their characteristics and helps children to understand how animals differ in nature. The illustrations are terrific and we enjoyed reading this book together.

Vicki says

This is one awesome book for sharing facts about spiders with children. It's spot on with text and illustrations. An oldy but goody!

Katie Nanney says

This book is a good picture book if you want to learn more about spiders. It's simple enough for younger children to understand about spiders on a basic level. It would make a good read-aloud book and younger children would like the pictures. The pictures were very detailed and colorful and I enjoyed them a lot.

Elaine says

Made my skin crawl, but useful spider info.

Amy says

My daughter and I picked up this book from the library because she wanted to learn about spiders. Of all of the books we selected, this was the only spider book that hit the mark. All of the others were above her head or (at three years old) didn't hold her attention. This book was fun and entertaining. This is a great series for young children to learn and have fun while doing so! Highly recommend!

Zayneea says

Lovely book with beautiful illustrations teaching children all about spiders. Usually would not pick up a non-fiction book about spiders, but the pictures in this are cute not scary.

Ilenuca says

Info about spiders

Samantha Howard says

This book is about spiders. The author wrote this book for 5-8 year olds, so it would be great in lower elementary classroom. The book takes the perspective of a spider and tells a story, but the content is true and informational, making it an informational book. I chose this book because it is a chance for students to learn information, while enjoying a story and illustrations. Additionally, it is suitable for kindergarteners. This

book could be used to teach students about various bugs and insects.
