Age of Empyre Michael J. Sullivan

Once again The First Empire series has expanded, and now it will be 6 books. The last book will still be entitled Age of Empyre but a new book has to slide in between it and Age of Legend so here comes Age of Death.

Update 06/02/18 - Robin has now finished her review of this book, and while she does have "a few minor tweaks" (her words not mine) I can now say with confidence that the major issues raised in her first read of the series have been resolved. I can't begin to express what a milestone this is. Until I have Robin's "sign off" a book (or in this case the last half of a series), I consider the work to be on the operating table and whether it'll survive the surgery is up in the air. Now I can say the patient will not only pull through, but thrive. I'm expelling a huge sigh of relief and getting ready to incorporate her list of changes and get the book into the hands of the beta readers.

Update 04/17/18 - after several years of sitting idle (while I worked on the first three books of the series. I finally got around to finishing up the series. Book #4 went through some major rework and that necessitated a number of changes in this book. I've now incorporated them and the book is back in Robin's hands for a re-read and if she has additional changes, I suspect they will be small. Next step...getting the contract signed so this (and the other remaining two books of the series) can get "out there"!

Update 11/21/15 - If all goes well I plan on doing my second-pass edit on this starting February 2016. Of course it'll still need to go through beta and have my editor look at it, but for the most part I don't generally have significant changes through that process.
